

Microsoft Dynamics-NAV

Introducing EDI Maestro a Fully Integrated EDI Solution for Dynamics-NAV

Information Integration Group, Inc. (IIG) is a leading provider of Industry Specific Solutions and 3rd Party Integration Products for small to mid-sized companies since 1991.

IIG's EDI Maestro is the most effective EDI solution for Microsoft Dynamics-NAV. IIG has partnered with TrueCommerce to be able to offer a tightly integrated solution that will meet all of your EDI requirements. With TrueCommerce, all you need to become EDI enabled is Dynamics-NAV, an internet connection, a bar code printed and IIG's EDI Maestro.

Automatic Invoice export:

- Captures EDI invoices for export as 810 Invoice documents to TrueCommerce as part of Sales Order Sales Journal.
- Can be run manually during the day.
- Will now allow invoice to be exported twice.
- Can be used with and without batches.

TrueCommerce Advantages:

- Far lower cost to purchase and operate.
- Simple set up and use.
- Only requires a bar code printer and an internet connection.
- No interconnect fees, and low per transaction fees.
- Can generate ASN labels from either PO as received or from invoices imported

Simplified import interface:

- Customer specific Order No. Series
- Can either use the imported price or the customer's price code.
- Creates an import log, with detailed error messages.
- Log shows summary of items from orders imported.
- New items are imported as special order items to preserve pricing information, and the import log records a warning for the operator to follow up on.
- Order date is the Purchase Order date.
- Import program can do automatic imports by cycle time.
- Automatically export invoices on posting.

EDI Customer Setup:

- Set up order prefix and order number.
- Streamlined export of Ship To Addresses for TrueCommerce importing.
