

Information Integration Group, Inc.

SAGE MAS 500 ERP

Rental Maestro for Sage MAS 500 ERP

Information Integration Group, Inc. (IIG) is a leading provider of industry-specific business management solutions for small to mid-sized companies since 1991.

The Rental Maestro suite, developed by IIG, integrates seamlessly with Sage MAS 500 ERP. This powerful enhancement can handle all your rental needs from order entry to generation of rental contracts.

Complete Business Management ERP Solution for the Rental Industry

- Complete software for rental and crew management
- Manages rental operations from generation of quotes, to flexible pricing and billing, to viewing inventory availability, to streamlined warehouse operations
- Provides for a fully-integrated software solution across all applications
- Rental Maestro is build on the leading Sage MAS500 ERP products, utilizing the full functionality of all available modules
- Tracks costing of jobs by rolling up revenue and expenses for products sold, rentals, crews and sub-rentals
- Integrates with leading SageCRM and ACT CRM packages for complete end-to-end solution
- Allows for scheduling of deliveries and pickup
- Allows users to sell and rent on the same transaction, as well as selling or renting the same item

Rental Industry Specific features:

Billing and Pricing

- Flexible Pricing Options — daily, weekly, monthly, user defined period, or set amount per item
- Flexible Invoicing Options — bill in advance, upon return, periodically, or set custom invoicing policies for the extended rentals
- Allows for entry of different rental and billing periods by order
- Generates user-definable rental contract, invoice and pull sheet forms
- Allows for tracking and billing of missing and damaged inventory
- Automatically bills customers for missing and damaged products

Inventory Management

- Track status of serialized items — allows for creation of user definable serialized item status codes
- View time based inventory availability — drill down to specific orders for a given period
- Orders are managed by allowing users to process partial returns, early returns, late returns — Each item’s billing is reconciled when returned
- Allows for generation of sub-rental purchase orders from the Order Entry program; tracks and allows for returning of sub-rentals to vendors
- Allows for scheduling of preventive maintenance tasks for equipment
- Tracks past rentals of serialized items

Crewing

- Allows for required skill verification by nature of task and check for scheduling conflicts
- Allows for entry of required crewing at the time of rental order entry
- Allows for collection and invoicing of work done by the crew at the field - Information loaded directly into the Payroll system

Supported Platform

- Sage MAS 500 ERP
