Apparel Vertical Solutions

Apparel Maestro
The Complete Apparel Management Solution for Apparel Industry

Information Integration Group, Inc. (IIG) is a leading provider of Industry Specific Apparel for small to mid-sized companies since 1991.
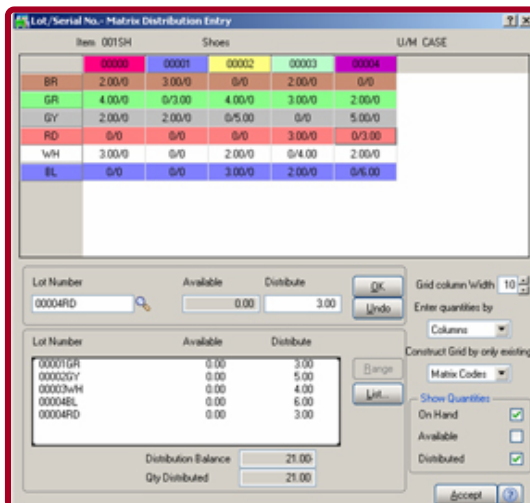

IIG's Apparel Maestro provides the additional functionality and streamlined entry of transactions needed to process Apparel transactions using the Sage 100 ERP Sales Order processing module.

- Complete software for tracking of quantities for user definable size and color attributes for each style
- Provides for a fully integrated software solution across all applications, processing quantities by size and color is supported in SO, IM, PO, RMA, BOM and WO modules.
- Apparel Maestro is build on the leading Sage 100 ERP Software products.
- Integrates with leading Sage CRM package for complete end-to-end solution
- Integration with business for both B2B and B2C customers; B2B entries are made using a size and color grid, B2C entries are made using drop downs.

Apparel Maestro Features

- Manages apparel (size and color) operations from generation of quotes, to flexible pricing and billing, to viewing inventory availability, to streamlined warehouse automation
- Ability to purchase and sell by user defined size and color attributes for each item
- Track sales by defined size and color attributes in addition to the style
- Ability to setup UPC codes by specific size and color
- Full pricing and costing support by size and color
- Ability to define pre-packs by item and Customer
- Ability to define stocking levels for each size and colors; auto generation of purchase orders based on defined minimum and maximum quantity levels defined for each size and color.
