

Mobile Field Services for Sage 100 ERP

Information Integration Group, Inc. (IIG) is a leading provider of Industry Mobile Field Services for small to mid-sized companies since 1991.

Mobile Field Services developed by IIG uses Sage SData Technology, which allows for seamless integration with Sage 100 ERP.

Mobile Field Service Entry

Allows field service technicians using any handheld device (Android, iPhone, iPad, Surface, tablet or notebook) to:

- Access task and dispatch information in the field
- Change the status of tasks and dispatches assigned
- Enter labor and material used in the field
- User license is not required for field technicians using the mobile solution.

Mapping Software

- Integration with MapPoint and MapQuest allows dispatchers to view the location of each technician and route technicians accordingly.

Features

- Capture customer signature in the field
- Display customer information
- Display equipment repair history

Supported Platform
Sage 100 ERP
