

Kit Pricing

Kit Pricing enhancement developed by Information Integration Group, Inc. (IIG) allows companies to group stock and non-stock items as kits and to setup the pricing behavior for the group items at the kit item level. Kits can be setup such that only the kit item is loaded with the price and the components at all loaded as free items into the sales order transaction.

LOAD STOCK AND NON-STOCK INTO SALES ORDERS BASED ON KIT SETTINGS

- **Create kit groupings using the Kit Specification program.** Stock and Non-Stock item are grouped as components to be loaded into the sales transaction when the kit items is entered on the sales order's detail tab.
- **Addition of IS Group flag.** Is Group checkbox is added to the General Settings tab of the Stock Items form to indicate items grouped using Kit Pricing enhancement.

LOAD COMPONENTS BASED ON OPTONS SETUP FOR THE KIT

- **User defined loading of components.** Additional stock and non stock items can be loaded into the sales order transactions based on user defined option categories and option codes.

LOADING KITS INTO SALES ORDERS

- **Added Add Grouped Stock & Non-Stock Items.** Added option to Sales Order form allows for viewing items grouped using Kit Pricing enhancement and loading of the grouped item into the sales order transaction.

The screenshot shows the Acumatica Sales Orders interface. The main window displays an 'Option Category' table with the following data:

Qty.	Warehouse	Inventor ID	Description	Sale Unit	Qty. On Hand	Qty. Availabl	Alternate Type	Alternate
1.00	RETAIL	ELECO...	Dell desktop computer	EA	435.00	429.00	Global	

Below this table, there is a list of option categories with checkboxes for 'Require' and 'Option Code':

Option Category ID	Option Category	Require	Option Code	Description
Option Category 1	Memory package	<input checked="" type="checkbox"/>	TR	TR
Option Category 2	High speed SPU	<input type="checkbox"/>		
Option Category 3	Disc Drive	<input checked="" type="checkbox"/>	CF	CF

KEY BENEFITS
