Installation Instructions and Cautions

PLEASE NOTE: *SAGE 100 must already be installed on your system before installing any IIG enhancement. If not already done, perform your SAGE 100 installation and setup now; then allow any updating to be accomplished automatically. Once SAGE 100 installation and file updating is complete, you may install your IIG enhancement product by following the procedure below.*

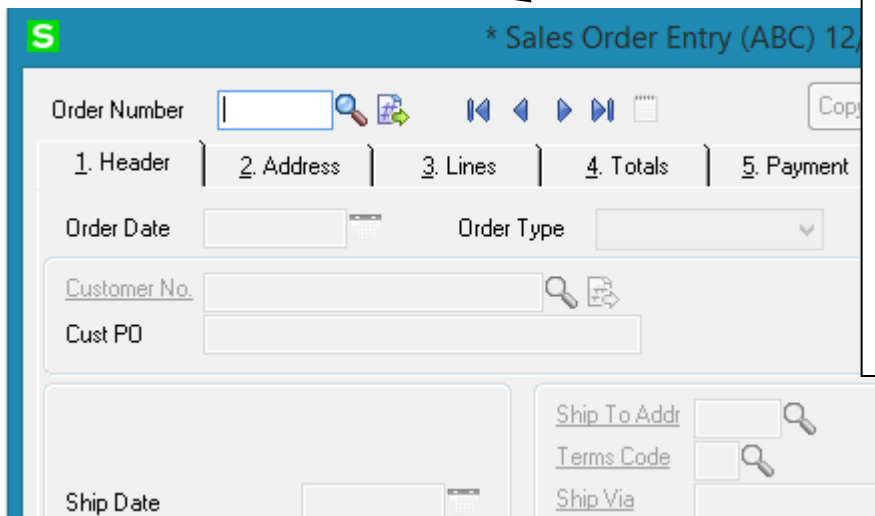

Wait! Before You Install – Do You Use CUSTOM OFFICE?

THIS IS AN IMPORTANT CAUTION: *If you have Custom Office installed, **and** if you have modified any SAGE 100 screens, you must run **Customizer Update** after you do an enhancement installation.*

But wait! BEFORE you run **Customizer Update**, it is very important that you **print all of your tab lists**. Running **Customizer Update** will clear all Tab settings; your printed tab list will help you to reset your Tabs in Customizer Update. **Custom Office** is installed on your system if there is an asterisk in the title bar of some of the screens. The asterisk indicates that the screen has been changed.

An **asterisk** in a window's title bar indicates that the screen has been modified. This means that **Custom Office** is installed.

Follow all the instructions on this page before you run **Customizer Update!**

Registering IIG products

IIG Enhancement should be registered to be able to use it. If registration is not performed, the enhancement will work in a demo mode for a limited time period. The registration can be still done during the demo period.

Select the **IIG Product Registration** program under the **Library Master Setup** menu of the SAGE 100.

If this option is not listed under the Library Master Setup menu, go to the main menu, and select **Run** from the **File** menu. Type in SVIIGR and click **OK**.

Enhancement	Level	Release Date	Serial Number	Unlocking Key
IIG Enhancement	5.40		AAAAAAAAAAAAAAAAA	BBBB

Enter **Serial Number** and **Unlocking Key** provided by IIG, and click **OK**.

If multiple IIG Enhancements are installed, Serial Numbers and Unlocking Keys should be entered for each enhancement.

Use the **Print Registration Form** button to print IIG Registration Form.

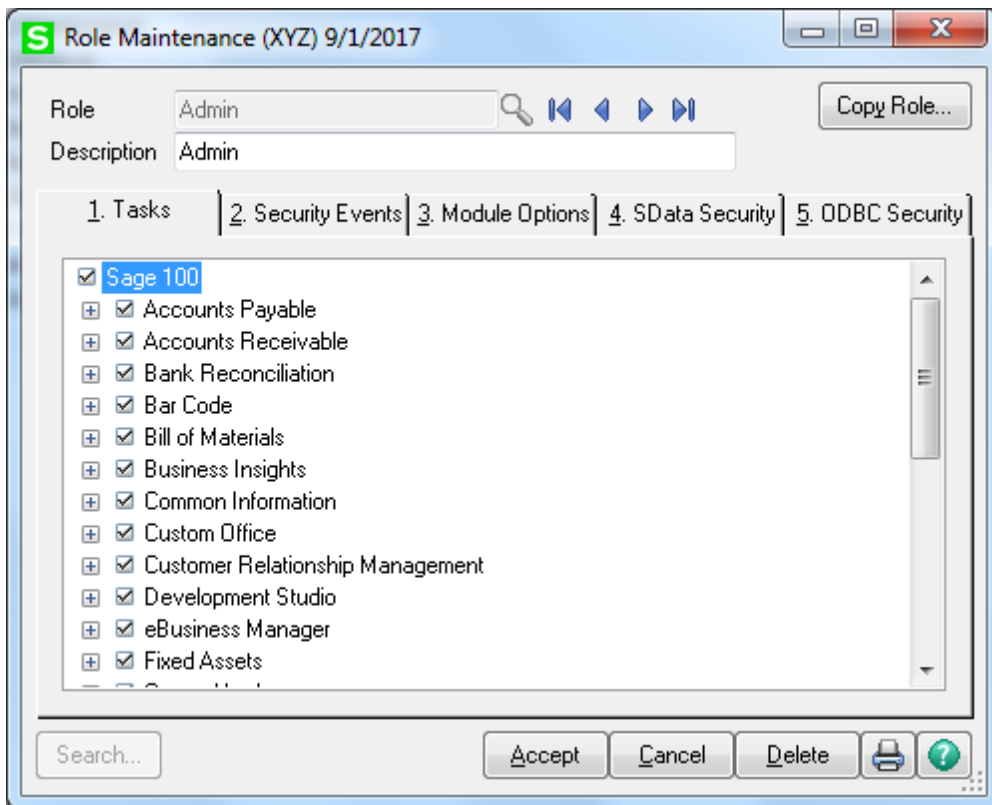

ODBC Security

After installing an **IIG Enhancement**; it is **very important to verify** whether or not the **Enable ODBC Security within Role Maintenance** check box is selected in the **System Configuration** window of your system. If it is selected you must assign ODBC security permissions and allow access to custom data tables/fields for the Roles defined in your system.

Role Maintenance

After installing an **IIG Enhancement**, permissions must be configured for newly created Tasks and Security Events.

Introduction

This enhancement has added the ability to use up to 6 decimal places for **Quantity** and **Unit Cost** fields in **Bill of Material** module.

This includes reports, data entry screens, inquiry screens, etc.

*Note: This enhancement only affects the **Bill of Materials** module. It does not function in other modules. Also it does not function in the **Miscellaneous Item Maintenance** opened from **Bill of Materials** menu.*

*Note: Not recommended to set the **Quantity Entries** and **Cost Entries** options values of **BM** module less than the ones in **Common Information Options**.*

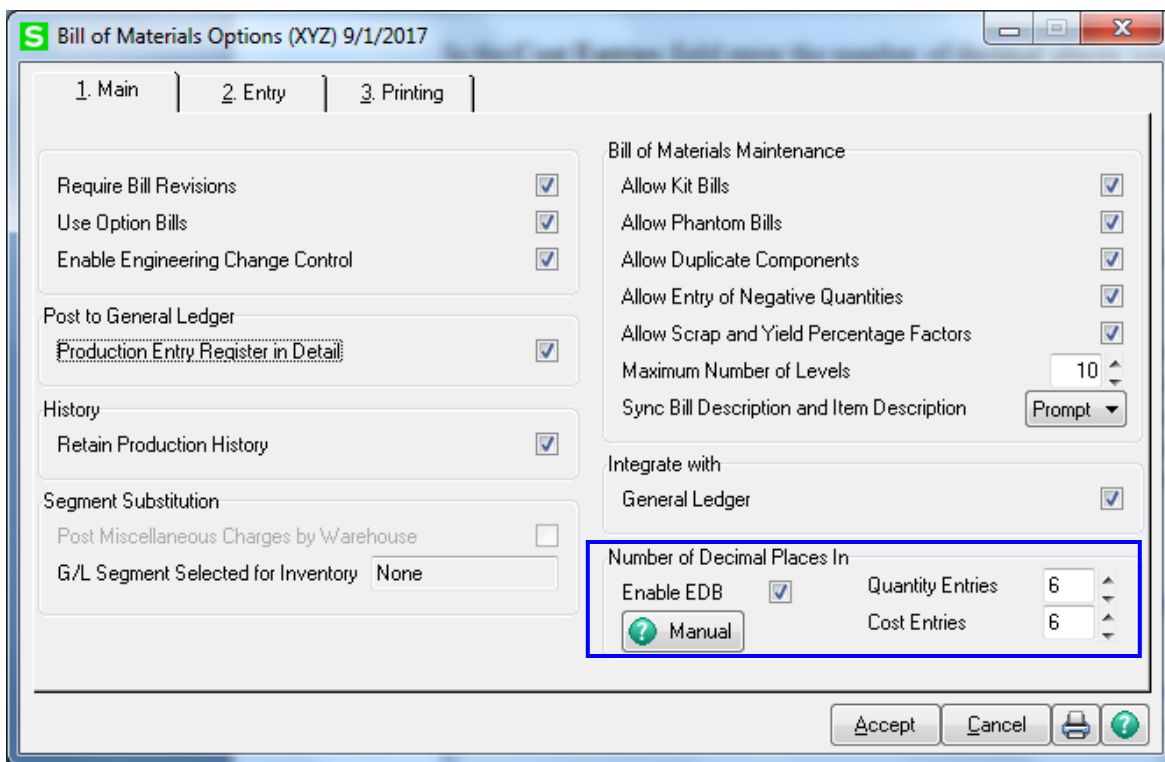

Bill of Materials

Bill of Materials Options

The **Number of Decimal Places In** group of fields has been added to the **Main** tab of **Bill of Materials Options** screen. Check the **Enable EDB** option to use numbers of decimal places for the quantity and cost fields (mentioned in the **Quantity Entries** and **Cost Entries** fields) instead of corresponding values mentioned in the **Common Information Options**.

In the **Quantity Entries** field enter the number of decimal places you wish to use for the quantity fields (up to 6 decimal places are allowed).

In the **Cost Entries** field enter the number of decimal places you wish to use for the unit cost fields (up to 6 decimal places are allowed).

The Manual button enables access to the **EDB2017.PDF** file.

Bill of Materials

Here is an example of 6 decimal places of the Quantity/Bill, in the **Bill of Materials Maintenance**:
