Multi-Currency Vertical Solutions

Introducing the Multi-Currency Maestro for AP & PO, and for AR & SO

Information Integration Group, Inc. (IIG) is a leading provider of Multi-Currency vertical solutions for Sage MAS 90 and Sage MAS 200.

Multi-Currency for AP & PO

The Multi-Currency for AP & PO enhancement allows for processing purchase orders and payments in different currencies. Exchange rates are entered by day for each currency code; vendors can be setup to use the entered exchange rate or a fixed rate by vendor; payment amounts can be finalized based on the exchange rate at the time of invoice entry or check creation. Purchase orders can be entered at the domestic or foreign currency, the Inventory Maintenance program displays the costing information in both base and foreign currencies. Purchase orders can be generated in foreign currency and information in foreign currency is printed on purchasing and accounts payable aging and check selection reports.

Multi-Currency for AR & SO

The Multi-Currency for AR & SO enhancement allows for processing sales orders and cash receipts in foreign currencies. Exchange rates are entered by day for each currency code; customers can be setup to use the entered exchange rate or a fixed rate by customer; payment amounts can be finalized based on the exchange rate at the time of order entry or cash receipts. Sales orders can be entered in the base or foreign currency, the sales order and invoice amounts can be printed in currency code entered for the sales order / customer. Cash Receipts information can be entered in the base or foreign currency and any variances due to the exchange rate is posted to GL. The Sales Order / Quote History display the information in foreign currency.
