SAGE MAS 500

## Document Management Maestro

The Document Management Maestro developed by IIG integrates seamlessly with Sage MAS 500 ERP and Microsoft SharePoint Products. This powerful enhancement can streamline your daily operations by allowing you to manage your documents by both scanning the documents received from your business partners as well as documents printed by the MAS500 system. The powerful search engine allows you to view the stored images directly from the MAS500 programs.

## Complete Document Management System for Sage MAS 500 ERP

- Scan A/R Checks, A/P Invoices, Customer Purchase Orders, Pick Tickets with hand written quantities or other documents such Reseller Certificates or Credit Applications directly into the system. Link documents to existing MAS500 transactions form the Document Scan program.

- Image of system generated documents such as A/R Invoices, A/P Checks will be stored directly into the image database.

- Forward images of the A/P Invoices scanned to the proper individuals in the company for approval.

- Documents can be linked to transactions in Sage MAS 500 ERP; users can enter the information directly off the scanned images.

- Scanned copies of the pick tickets with actual quantity shipped and shippers and packers information into the system for future reference.
