Point of Sale Vertical Solutions

Point of Sale Maestro
The Complete Business Management Solution to Process POS Transactions

Information Integration Group, Inc. (IIG) is a leading provider of Industry Specific Point of Sale for small to mid-sized companies since 1991.

IIG's Point of Sale provides the additional functionality and streamlined entry of transactions needed to process POS transactions using the Sage 100 ERP Sales Order processing module.

- **Support for Debit Card including signature capture & pin entry**

- **Support for Sage Payment Solution using PC Payware**

- **Support for PC Payware replacement for PC Charge**

- Integration with Credit Card / Check Swipe readers
- Support for pin terminals such as the VeriFone 850 which includes signature capture.
- Support for Pin Debit. Can be run over a VPN for remote stores using either Citrix or Terminal Server.
- Support for all payment types including Gift Card and Debit.
- Process ACH payments for orders, SO invoices, and AR invoices
- Opening of cash drawer based on the payment type entered
- Allowing users to enter up to 4 payment types per transaction
- Support for multiple payment / deposit entry per transaction
- Displaying of change due
- Printing of transaction receipt
- Support for a cashier register; payments can be applied to combination of sales orders, invoices or updated as payment on account
- Track and reconciliation transactions by Register

Streamline entry of POS transactions:

- Transfer program control to item # entry after entry of customer number
- Option to auto advance the invoice number after completing each transaction
- Auto printing of the receipt after payment
- Loading of the salesperson code based on the Sage 100 ERP user code
- Setting default values for warehouse, tax, ship via, invoice date, invoice type, based on the workstation
- Option to scan entry of lines at single quantities
- Ability to apply check or cash deposits to sales orders, invoices or to customer account and to use store credit for customers
