Installation Instructions and Cautions

PLEASE NOTE: SAGE 100 ERP must already be installed on your system before installing any IIG enhancement. If not already done, perform your SAGE 100 ERP installation and setup now; then allow any updating to be accomplished automatically.

Once SAGE 100 ERP installation and file updating is complete, you may install your IIG enhancement product by following the procedure below.

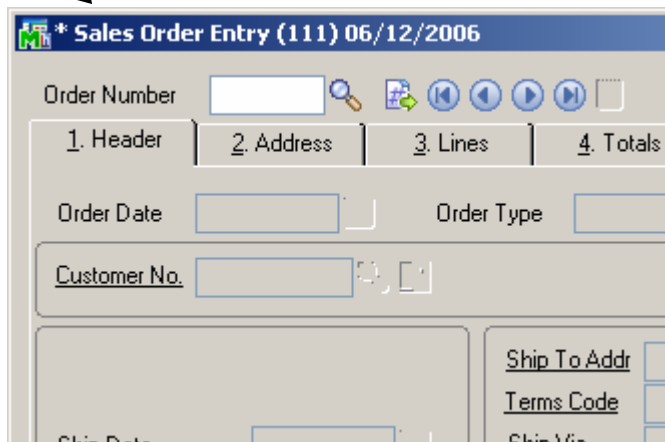

Wait! Before You Install – Do You Use CUSTOM OFFICE?

THIS IS AN IMPORTANT CAUTION: If you have Custom Office installed, **and** if you have modified any SAGE 100 ERP screens, you must run **Customizer Update** after you do an enhancement installation.

But wait! BEFORE you run **Customizer Update**, it is very important that you **print all of your tab lists**. Running **Customizer Update** will clear all Tab settings; your printed tab list will help you to reset your Tabs in Customizer Update. **Custom Office** is installed on your system if there is an asterisk in the title bar of some of the screens. The asterisk indicates that the screen has been changed.

An **asterisk** in a window's title bar indicates that the screen has been modified. This means that **Custom Office** is installed.

Follow all the instructions on this page before you run **Customizer Update!**

Registering IIG products

IIG Enhancement should be registered to be able to use it. If registration is not performed, the enhancement will work in a demo mode for a limited time period. The registration can be still done during the demo period.

Select the **IIG Product Registration** program under the **Library Master Setup** menu of the SAGE 100 ERP.

If this option is not listed under the Library Master Setup menu, go to the main menu, and select **Run** from the **File** menu. Type in SVIIGR and click **OK**.

| Enhancement | Level | Release Date | Serial Number | Unlocking Key |
|-----------------|-------|--------------|------------------|---------------|
| IIG Enhancement | 5.10 | | AAAAAAAAAAAAAAAA | BBBBB |

Enter **Serial Number** and **Unlocking Key** provided by IIG, and click **OK**.

If multiple IIG Enhancements are installed, Serial Numbers and Unlocking Keys should be entered for each enhancement.

Use the **Print Registration Form** button to print IIG Registration Form.

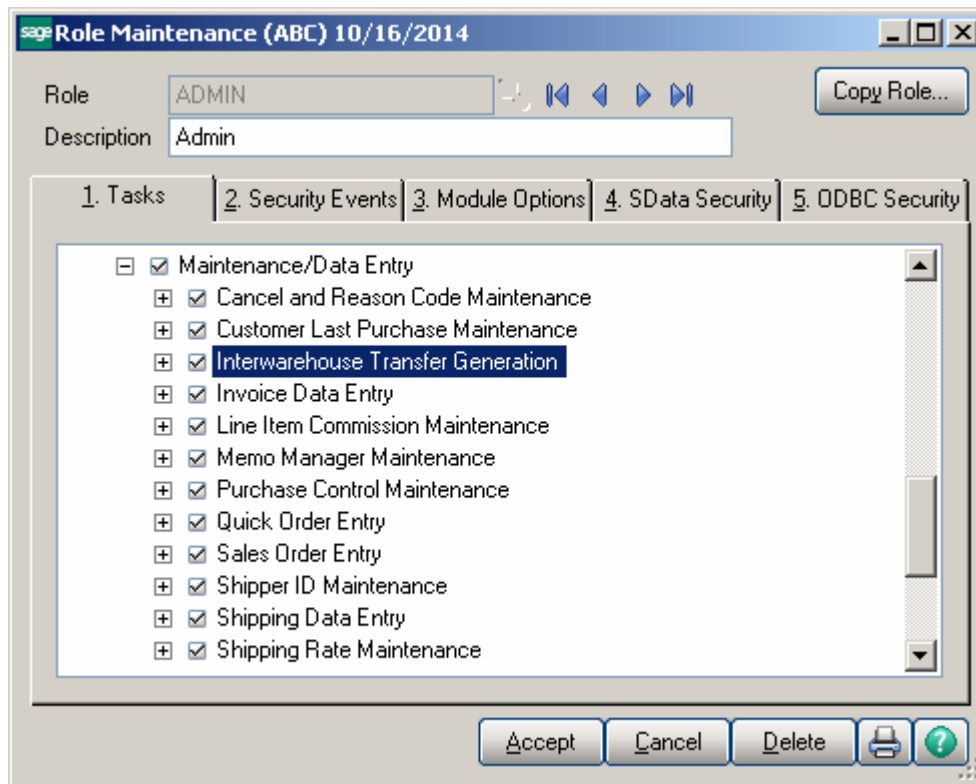

ODBC Security

After installing an **IIG Enhancement**; it is **very important to verify** whether or not the **Enable ODBC Security within Role Maintenance** check box is selected in the **System Configuration** window of your system. If it is selected you must assign ODBC security permissions and allow access to custom data tables/fields for the Roles defined in your system.

Role Maintenance

After installing an **IIG Enhancement**, permissions must be configured for newly created Tasks and Security Events.

Introduction

The **Multi-Warehouse Location Order Processing** Enhancement introduces the Interwarehouse (virtual warehouse) concept for transferring items between physical warehouses. When items are transferred, they are assigned to a “virtual warehouse” during transit. Since items are no longer in the “Ship From” warehouse, and are not yet received in the “Ship To” warehouse, these items are assigned to this virtual warehouse by means of an Interwarehouse Transfer Generation performed at the Ship From warehouse. When items are received, the Ship To warehouse performs Transfer Activation to verify that the proper items and quantity were actually sent.

Warehouse Code Maintenance

To assign an interwarehouse, first enter it in the **Warehouse Code Maintenance** screen.

Select the **Warehouse Code Maintenance** program under **Inventory Management Setup** menu.

The screenshot shows the Sage Warehouse Code Maintenance window. The title bar reads "sage Warehouse Code Maintenance (ABC) 10/16/2014". The "Warehouse Code" field contains "1/2" and has navigation buttons. The "Description" field contains "Inter whse from 001 to 002". Below these are several input fields: Name, Address, ZIP Code, City, State, Country, Telephone, Ext, Fax, E-mail Address, and Contact. At the bottom, there is a "Post to Location" field and a row of buttons: "Int.Whse", "Accept", "Cancel", "Delete", a printer icon, and a help icon.

You can use some special notation convenient for you. In our example, we enter the code of an interwarehouse in the following format: Ship From Warehouse Code / Ship To Warehouse Code. The warehouse with code 1/2 is an interwarehouse that contains merchandise in-transit from warehouse 001 to warehouse 002.

Enter codes and descriptions for interwarehouses and save them clicking the **Accept** button. Leave the address fields blank.

Now that you have interwarehouses, you can assign them.

Select the **Warehouse Code** for which you want to assign an interwarehouse and click the **Int.Whse** button.

Multi-Warehouse Location Order Processing 8

Warehouse Code: 001
Description: EAST WAREHOUSE

Name: _____
Address: _____
ZIP Code: _____
City: _____ State: _____
Country: _____
Telephone: _____ Ext: _____

Warehouse Code: 001 EAST WAREHOUSE

| | To Whse Code | Description | Inter Whse Code | Description |
|---|--------------|-----------------------------|-----------------|-----------------------------|
| 1 | 000 | Interwarehouse for 001->000 | 1/0 | Interwarehouse for 001->000 |
| 2 | 002 | Inter whse from 001 to 002 | 1/2 | Inter whse from 001 to 002 |
| 3 | | | | |

Accept Cancel

Enter the To Whse and Inter Whse Codes in the Inter Warehouse Code Maintenance screen.

The list displays all the Inter warehouses assigned to the selected **From** warehouse. You can modify or delete interwarehouses in this list.

Multi-Warehouse Location Order Processing 9

Click **Accept** to save the assigned interwarehouses.

The **Inter Warehouses** setup for current warehouse are displayed on the Warehouse Code listing report.

The screenshot displays the SAP Warehouse Code Listing report. The main report area is divided into sections for warehouse details and interwarehouse assignments. The top section shows details for a warehouse in Costa Mesa, CA, with ZIP Code 92626. Below this, there are two interwarehouse assignments. The first assignment is from Warehouse 001 (EAST WAREHOUSE) to Warehouse 000 (CENTRAL WAREHOUSE), with an interwarehouse code of 0/1 and description 'inter 000 -> 001'. The second assignment is from Warehouse 002 (WEST WAREHOUSE) to Warehouse 000 (CENTRAL WAREHOUSE), with an interwarehouse code of 1/0 and description 'Interwarehouse for 001->000'. The report also includes contact information such as City, State, Country, Telephone, Fax, E-mail Address, and Contact Name for the warehouses.

| To Warehouse | Description | Inter Warehouse | Description |
|--------------|----------------|-----------------|-----------------------------|
| 001 | EAST WAREHOUSE | 0/1 | inter 000 -> 001 |
| 002 | WEST WAREHOUSE | 1/0 | Interwarehouse for 001->000 |

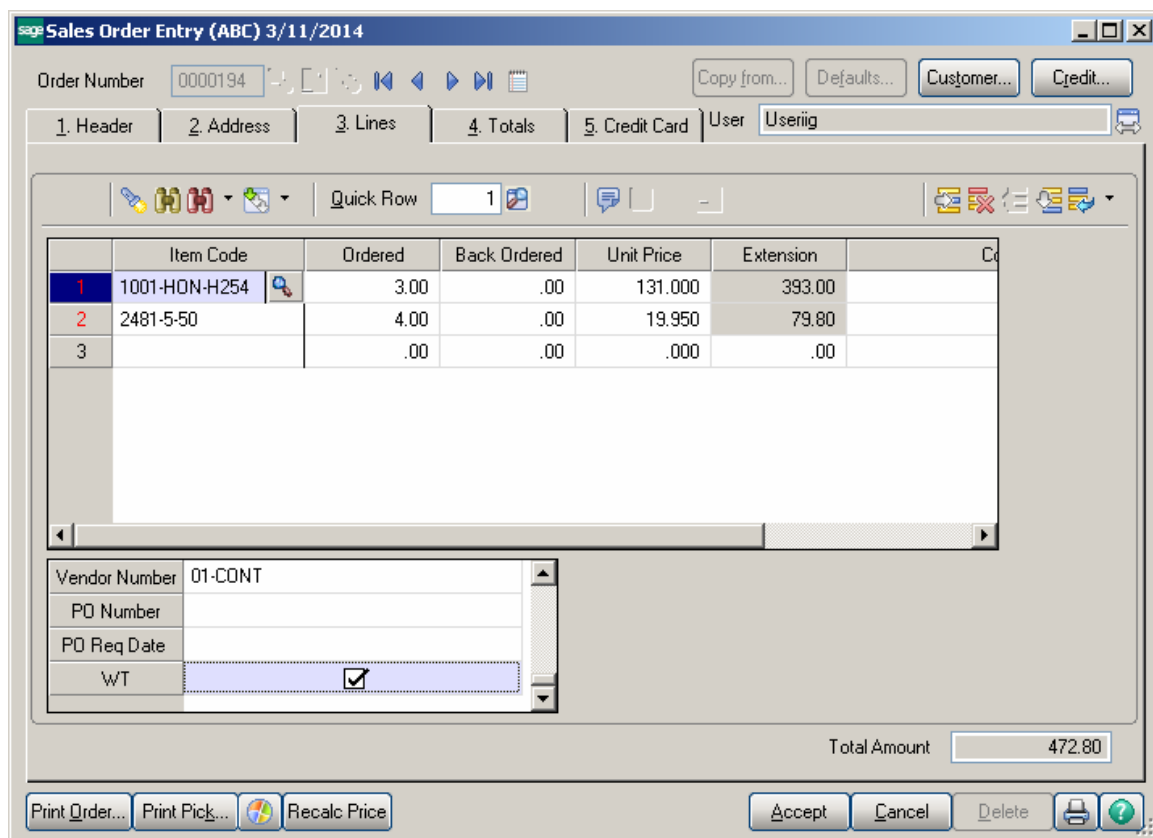

Interwarehouse Transfers Processing

Interwarehouse transfer processing is available only if the Transaction Entry Batch Processing is enabled in the Inventory Management Options.

It is necessary to enable **Lot/Serial Distribution** in **Sales Order Entry** in order to have Interwarehouse transfers processed for Lot/Serial Items.

Sales Order Entry

The **WT** (Warehouse Transfer) check box added to the **Lines** tab of **Sales Order Entry** indicates if the warehouse transfer should be used when shipping the selected item.

The screenshot shows the Sage Sales Order Entry (ABC) 3/11/2014 interface. The Order Number is 0000194. The interface is divided into tabs: 1. Header, 2. Address, 3. Lines, 4. Totals, 5. Credit Card. The current tab is 3. Lines. The table below shows the items:

| | Item Code | Ordered | Back Ordered | Unit Price | Extension | Co |
|---|---------------|---------|--------------|------------|-----------|----|
| 1 | 1001-HON-H254 | 3.00 | .00 | 131.000 | 393.00 | |
| 2 | 2481-5-50 | 4.00 | .00 | 19.950 | 79.80 | |
| 3 | | .00 | .00 | .000 | .00 | |

Below the table, there is a form with the following fields:

| | |
|---------------|-------------------------------------|
| Vendor Number | 01-CONT |
| PO Number | |
| PO Req Date | |
| WT | <input checked="" type="checkbox"/> |

The Total Amount is 472.80. At the bottom, there are buttons for Print Order..., Print Pick..., Recalc Price, Accept, Cancel, Delete, and a help icon.

When a line is added with a **Warehouse** different from the one specified on the **Header** tab of the Order, the program displays a message asking whether it is a **Warehouse Transfer**.

Multi-Warehouse Location Order Processing 11

Answering **Yes** checks the **WT** box and marks the line as warehouse transfer line.
Answering **No** clears the check, so that warehouse transfer will not be used for this line.

The same message is displayed when changing the warehouse of an existing line not marked as **WT**.

A line cannot be checked as **WT**, if its warehouse matches with the warehouse on the **Header** tab.

The following message appears upon selecting the WT checkbox for a Lot/Serial Item if the Lot/Serial Distribution is not enabled in the Sales Order options screen:

When selecting the warehouse specified on the **Header** tab for a **WT** line, the **WT** check box is automatically cleared.

An order having **WT** lines cannot be invoiced. When selecting such order in the **Invoice Data Entry** program, the following message is displayed:

Note: If there is a lot/serial Item in the Sales Order lines, it is necessary to have that line fully distributed in order to have Transfer generated for that line.

Interwarehouse Transfer Generation

Select the **Interwarehouse Transfer Generation** program in the Sales Order Main menu.

Note: For running this program it is necessary to enable Batch Processing in the Inventory Management Options.

The I/M Transaction Entry Batch screen is opened:

Generate Transfer From Warehouse

To Warehouse

| Select Field | Operand | Value |
|--------------------|---------|-------|
| Sales Order Number | All | |
| Sales Order Date | All | |

Enter the **From** and **To Warehouse Codes**, and make selections of the Sales Orders for which the transfers will be generated.

Multi-Warehouse Location Order Processing 13

You may select **Sales Orders** by **Numbers** and **Dates**.

| Select Field | Operand | Value |
|--------------------|---------|-------|
| Sales Order Number | All | |
| Sales Order Date | All | |

If the **From** and **To Warehouses** are not specified, the program will select order lines for all the warehouses.

The transfers will be generated for the items with the **WT** checkbox selected in the **Lines** tab of the Sales Order.

Click the **List** button to view the list of the transfers to be generated.

The lines, for which the program cannot generate Inter-warehouse transfer transactions, are flagged with "N".

Multi-Warehouse Location Order Processing 14

| Order No | Item Code | From Whse | Description | To Whse | Description | |
|----------|---------------|-----------|----------------|---------|----------------|---|
| 0000188 | 2480-8-50 | 001 | EAST WAREHOUSE | 002 | WEST WAREHOUSE | Y |
| 0000194 | 1001-HON-H254 | 001 | EAST WAREHOUSE | 002 | WEST WAREHOUSE | Y |
| 0000194 | 2481-5-50 | 001 | EAST WAREHOUSE | 002 | WEST WAREHOUSE | Y |

Proceed

The **To Whse Code** can be changed for the selected line.

The Lines can be deleted through the **Delete Row** button.

Click **Proceed** to select all the lines for transfer generation.

If **Lot/Serial Distribution** is enabled in the **Sales Order Options** it is necessary to have all Lot/Serial lines fully distributed in the Sales Order before proceeding with Transfer generation.

For the lines flagged with "N", the program will not generate Inter-warehouse Transfers.

| Ref Number | Comment | From | To |
|------------|--------------------------------|------|-----|
| 00000070 | Generated From S/O. IntWrh 1/2 | 001 | 002 |

OK

Multi-Warehouse Location Order Processing 15

If there is no line to generate a transfer, the program displays the following message:

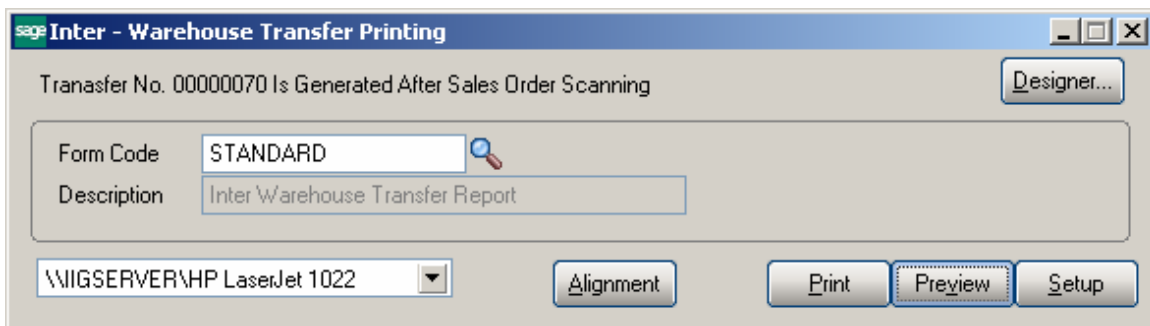

After generating transfers, the list of the generated transfers is displayed:

One transaction is generated for all the transfers with the same From and same To warehouses. Separate line in the transaction is generated for each order line.

Kits are normally processed as standard items.

The **Interwarehouse Transfer Generation** program processes only standard order and backorder lines.

After generating transfers, the **Interwarehouse Transfer Printing** screen is displayed. Click **Print** to print the list of generated transfers, **Preview** to view the list, or **End** to close the screen without printing.

Here is an example of printout:

Transfer Generated from Sales Order

To process the generated Transfer, select the **Transaction Entry** program under the **Inventory Management Main** menu.

The screenshot shows the Sage Transaction Entry (ABC) 10/16/2014 window. The window title bar includes the Sage logo and the text 'Transaction Entry (ABC) 10/16/2014'. The main area contains several fields and buttons:

- Transaction Type:** A drop-down menu set to 'Transfers' with navigation buttons (back, forward, refresh).
- Entry Number:** A text box containing '00000070' with a refresh button.
- Batch:** A text box containing '00026' with a refresh button.
- Navigation:** Two buttons labeled '1. Header' and '2. Lines'.
- Transaction Date:** A text box containing '10/16/2014' with a calendar icon.
- Transfer From Warehouse:** A text box containing '001' with a refresh button, followed by the text 'EAST WAREHOUSE'.
- Transfer To Warehouse:** A text box containing '002' with a refresh button, followed by the text 'WEST WAREHOUSE'.
- Landed Cost:** A button labeled 'Landed Cost...'.
- Comment:** Two text boxes containing 'Generated From S/O.' and 'IntWrh 1/2'.
- Buttons:** A row of buttons at the bottom: 'Accept', 'Cancel', 'Delete', a printer icon, and a help icon.

Select **Transfers** from the **Transaction Type** drop-down list; then select the generated **Entry Number**.

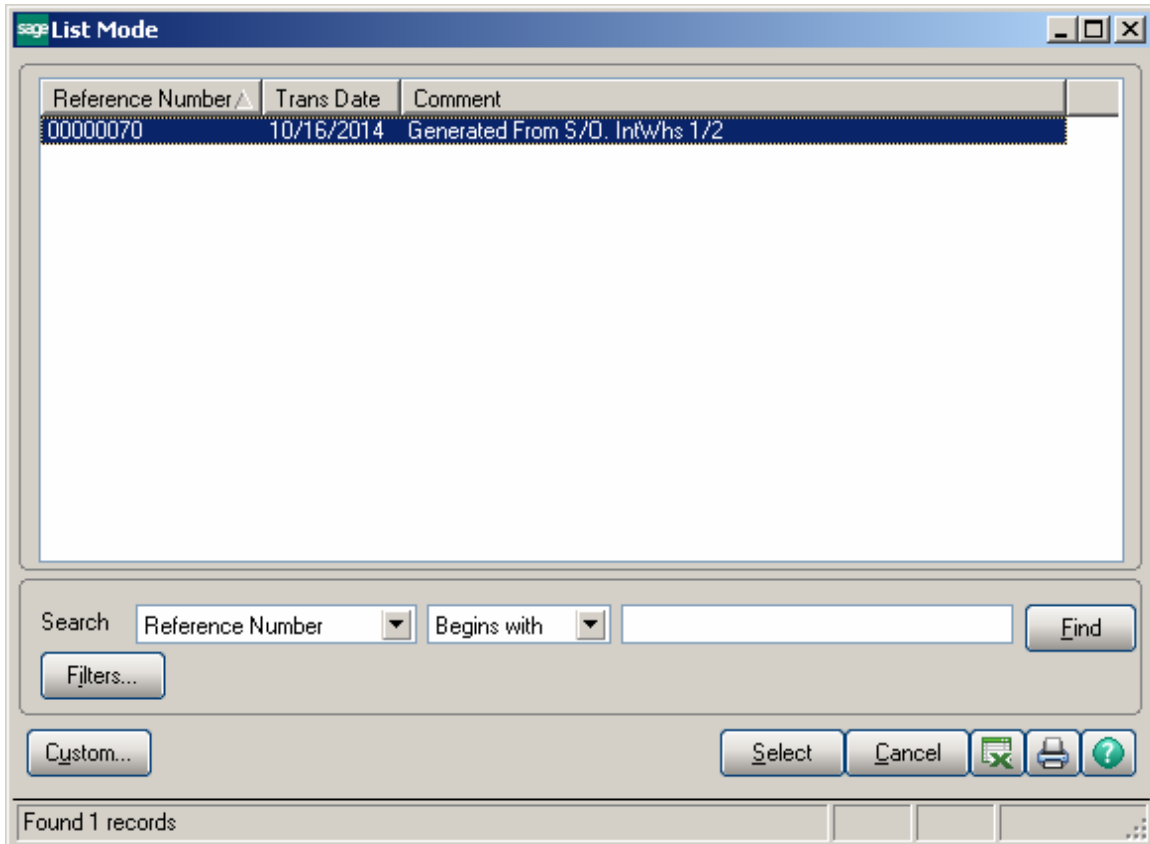

The **Transfer From Warehouse**, **Transfer To Warehouse**, and **Comments** fields are display-only.

The **Comment** field shows the source of the generated transactions. It displays the **Generated From S/O** text and the **InterWarehouse Code** used for the transactions generated by the **Interwarehouse Transfer Generation** program. The **Generated From InterWarehouse Code** and number of the source transaction for the transactions generated by the **Transfer Activation** program.

Multi-Warehouse Location Order Processing 18

Transfers generated from Sales Order cannot be deleted (The Delete button is disabled for such Transfers). The distribution for Lot/Serial Item cannot be changed in the Transfers generated from Sales Order, it can be viewed only.

Here is the list of generated transactions:

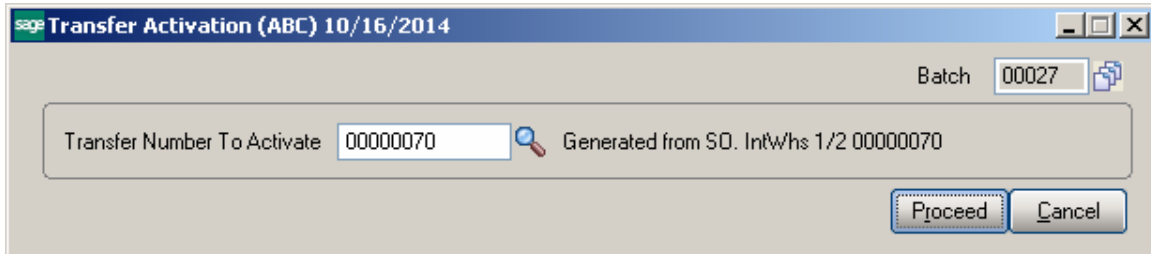

The screenshot shows a SAP List Mode window with a table containing one record. The table has three columns: Reference Number, Trans Date, and Comment. The record shows Reference Number 00000070, Trans Date 10/16/2014, and Comment Generated From S/O. Int/Whs 1/2. Below the table is a search and filter section with a search field set to 'Reference Number' and 'Begins with', a 'Find' button, and a 'Filters...' button. At the bottom, there are buttons for 'Custom...', 'Select', 'Cancel', and icons for printing and help. A status bar at the bottom indicates 'Found 1 records'.

| Reference Number | Trans Date | Comment |
|------------------|------------|---------------------------------|
| 00000070 | 10/16/2014 | Generated From S/O. Int/Whs 1/2 |

Run the **Transaction Journal** program under the **Inventory Management Main** menu to update the transactions.

Transfer Activation

After the transactions generated by the **Interwarehouse Transfer Generation** program are updated, select the **Transfer Activation** program under the **Inventory Management Main** menu.

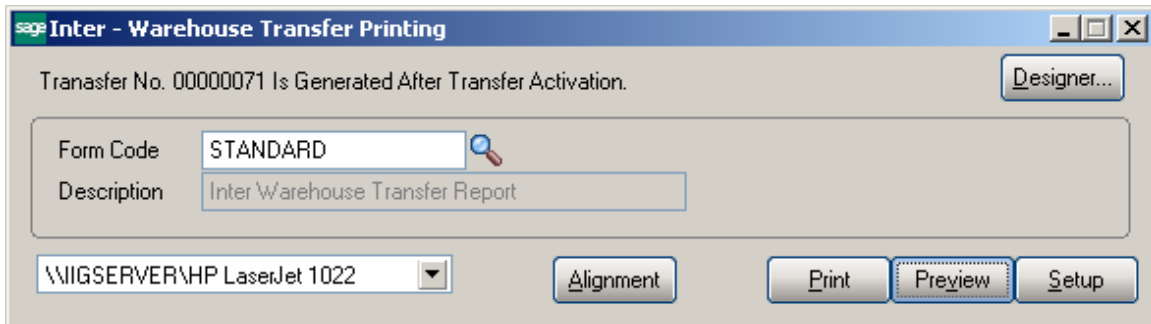

The screenshot shows a dialog box titled "sage Transfer Activation (ABC) 10/16/2014". In the top right corner, there is a "Batch" field with the value "00027". Below this, there is a search bar for "Transfer Number To Activate" containing the value "00000070". To the right of the search bar, it says "Generated from SO. IntWhs 1/2 00000070". At the bottom right, there are two buttons: "Proceed" and "Cancel".

Select the **Transfer Number** to be activated.

Click **Proceed**.

The **Interwarehouse Transfer Printing** screen displays the number of generated Transfer and allows printing or previewing it.

The screenshot shows a dialog box titled "sage Inter - Warehouse Transfer Printing". At the top, it says "Transfer No. 00000071 Is Generated After Transfer Activation." and has a "Designer..." button. Below this, there is a search bar for "Form Code" containing the value "STANDARD". Underneath, there is a "Description" field with the text "Inter Warehouse Transfer Report". At the bottom left, there is a printer selection dropdown menu showing "\\IIGSERVER\HP LaserJet 1022". To the right of the printer selection are four buttons: "Alignment", "Print", "Preview", and "Setup".

Multi-Warehouse Location Order Processing 20

Here is an example of printout:

The screenshot shows a SAP report window titled "Inter - Warehouse Transfer Generation". The window includes a toolbar with icons for printing, help, and navigation. The report content is as follows:

Inter - Warehouse Transfer Generation
ABC Distribution and Service Corp. (ABC)

From Warehouse: 1/2 Inter whse from 001 to 002
To Warehouse: 002 WEST WAREHOUSE
Comment: Generated from IntWwhs 1/2.00000070

Transfer Number: 00000071

Multi-Warehouse Location Order Processing 21

Transaction Entry Generated by Transfer Activation

To process the generated Transaction Entry, select the **Transaction Entry** program under the **Inventory Management Main** menu.

Select **Transfers** from the **Transaction Type** drop-down list; then select the generated **Entry Number**.

The screenshot shows the Sage Transaction Entry (ABC) 10/16/2014 window. The window title bar includes the Sage logo and the text "Transaction Entry (ABC) 10/16/2014". The main area contains several fields and buttons:

- Transaction Type:** A drop-down menu set to "Transfers".
- Entry Number:** A text box containing "00000071".
- Batch:** A text box containing "00027".
- Transaction Date:** A date picker set to "10/16/2014".
- Transfer From Warehouse:** A text box containing "1/2".
- Transfer To Warehouse:** A text box containing "002".
- Comment:** A text box containing "Generated from IntWchs 1/2".
- Buttons:** "Accept", "Cancel", "Delete", "Landed Cost...", and a help icon.

The **Transfer From Warehouse**, **Transfer To Warehouse**, and **Comment** fields are display-only.

The **Comment** field is used to describe the source of the generated transactions. It displays the **Generated From InterWarehouse Code** and number of the source transaction for the transactions generated by the **Transfer Activate** program.

Run the **Transaction Journal** program under the **Inventory Management Main** menu to update the transactions.

Multi-Warehouse Location Order Processing 22

After that, the items are transferred to the destination warehouse, and the Sales Order can be invoiced and processed as normal order.

The quantity being transferred can be changed in the **Transaction Entry** program. This can be used if not all the quantity is delivered to the destination warehouse (part of the quantity remains in the interwarehouse). However, keep in mind that additional transfers cannot be generated from the Sales Order, or from the Transactions, once the Interwarehouse processing of the order is started. Any additional transfers should be performed manually.

The **Landed Cost...** button opens the **Landed Cost Entry** screen that is like the **Landed Cost Entry** opened from the **Receipt of Goods Entry** program.

This button is available for the transfers already activated and for the ones processed directly, without an interwarehouse.

| | Cost Type | Description | Method | Amount |
|---|-----------|-------------|--------|--------|
| 1 | FRGHT | Freight | Cost | 50.00 |
| 2 | | | | .00 |

Total Landed Cost: 50.00

During **Daily Transaction Register** update the **Landed Cost** amount is posted to the G/L Account specified for current Cost Type in the Landed Cost Maintenance.

Transfers Tracking in Sales Order

If the Sales Order contains **WT** (Warehouse Transfer) lines, the progress of the warehouse transfers can be tracked in the order.

When transfers are generated for the WT lines of the order by the **Interwarehouse Transfer Generation** program, a new field becomes visible on the **Header** tab of the **Sales Order Entry** screen for that order.

Multi-Warehouse Location Order Processing 23

The **Current Transfer** field displays the numbers of the transfers currently associated with the order.

The screenshot shows the SAP Sales Order Entry (ABC) 10/16/2014 window. The 'Current Transfer' field is highlighted with a blue box and contains the value 00000070. Other fields include Order Number 0000194, Order Date 3/14/2014, Order Type Standard Order, Customer No. 01-ABF, Ship Date 3/14/2014, Status New, Whse 002 WEST WAREHOUSE, Sales Tax WI, Ship To Addr 2, Terms Code 01 Net 30 Days, Ship Via UPS BLUE FOB, Confirm To John Quinn, E-mail artie@abf.com, Salesperson 0100 Jim Kentley, and Split Comm. No.

When transfers have been generated by the **Interwarehouse Transfer Generation** program, but have not yet been updated by the **Transaction Journal**, the field displays numbers of these transfers.

When a transfer is updated, the “U” is added to the beginning of number displayed in the **Current Transfer** field and the line’s warehouse is changed to the respective Inter Warehouse.
