Installation Instructions and Cautions

PLEASE NOTE: MAS 90 must already be installed on your system before installing any IIG enhancement. If not already done, perform your MAS 90 installation and setup now; then allow any updating to be accomplished automatically. Once MAS 90 installation and file updating is complete, you may install your IIG enhancement product by following the procedure below.

Introduction

The **RF Warehouse Automation enhancement** for MAS 90 is the tool you need to serve your customers more effectively. Your team will be able to enter sales orders, shipping data and receipts of goods while on the road with their Radio Frequency device with Windows CE — saving time and ensuring accuracy.

By connecting salespeople who are in remote locations to MAS 90 software, your company will be in a strategic position to serve your customers more quickly and more efficiently.

If you have salespeople who are traveling, Radio Frequency solutions can be a valuable addition to your company.

Before you run RFS

Before you start using **RF Warehouse Automation**, you must modify its desktop shortcut to be able to run it.

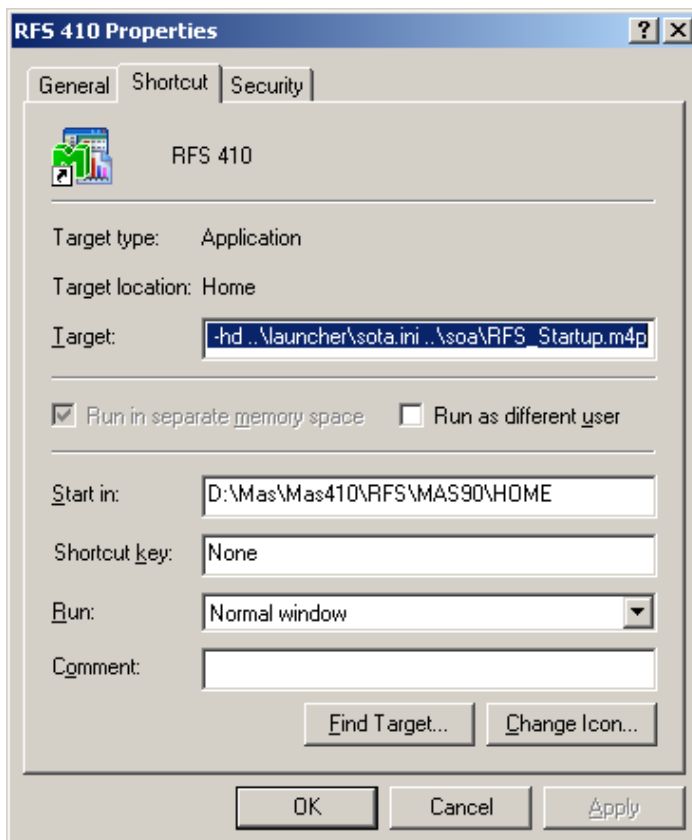

Map the Network drive where your MAS90 system is located.

Right-click the RFS icon on the desktop, and select the **Properties** in the pop-up menu. Go to the **Shortcut** tab.

In the **Target** field, type
your path\MAS90\Home\pvxwin32.exe -hd ..\launcher\sota.ini
..\soa\RFS_Startup.m4p

(where *your path* stays for the path to your MAS 90/200 system, e.g. D:\MAS\Mas420\Rfs).

Type the path to the MAS 90 system using mapped drive.

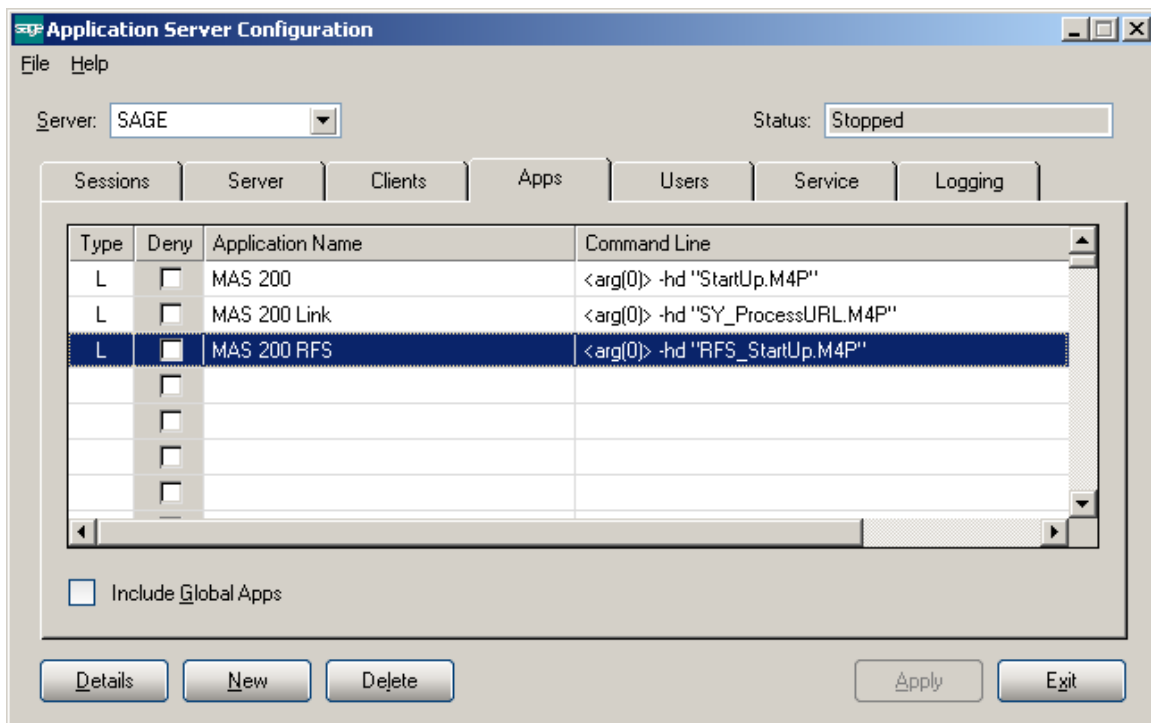

Click **Ok** or **Apply** to save this change.

RF Client Configuration for MAS200

To be able to run RF in the client server mode it is necessary to copy the files from **RFS_Workstation** folder to your **Workstation (Client) MAS90** folder. After copying the files it is necessary to create **rfs_sota.ini** file in the: **Client\MAS90\Launcher**. It is a copy of original **sota.ini** except that **APPLICATION=MAS 200 RFS** (this is a reference to a application in the application server). New Application called **MAS 200 RFS** should be added into the **Application Server Configuration**. It is a copy of MAS 200 application with the following changes:

Application Name: Mas 200 RFS

Lead Program: rfs_startup.m4p

Current - App Props for Server: "SAGE"

Application

App Name: MAS 200 RFS

ProvideX EXE: <Default>

Server INI: <Default>

Lead Program: RFS_StartUp.M4P

Extra CMD Options:

Arguments:

Start-In Directory: <Default>

Init Window: Normal

Clients

Client Type: Any Client Type

WindX Ver: 0.00.0000/00 Max WindX Ver: 0.00.0000/00

JavX Ver: 0.00.0000/00 Max JavX Ver: 0.00.0000/00

Options

Disable Application

Allow Client Extra CMD Options

Allow Client Arguments

Allow Client to Set EID

Allow Client to Set Start-In Directory

OS Level

Default Umask: 0000

Detach Spawns via Nohup

Additional Environment Vars:

OK Cancel

The following changes should be done in the MAS200 shortcut to launch RF:

The path of your client system is entered in the **Start in** field. The **rfs_sota.ini** and ***rfs_Client** are added in the **Target** field.

Registering IIG products

IIG Enhancement should be registered to be able to use it. If registration is not performed, the enhancement will work in a demo mode for a limited time period. The registration can be still done during the demo period.

Select the **IIG Product Registration** program under the **Library Master Setup** menu of the MAS 90.

If this option is not listed under the Library Master Setup menu, go to the main menu, and select **Run** from the **File** menu. Type in SVIIGR and click **OK**.

Enhancement	Level	Release Date	Serial Number	Unlocking Key
IIG Enhancement Name	4.30		AAAAAAAAAAAAAAAAAA	BBBB

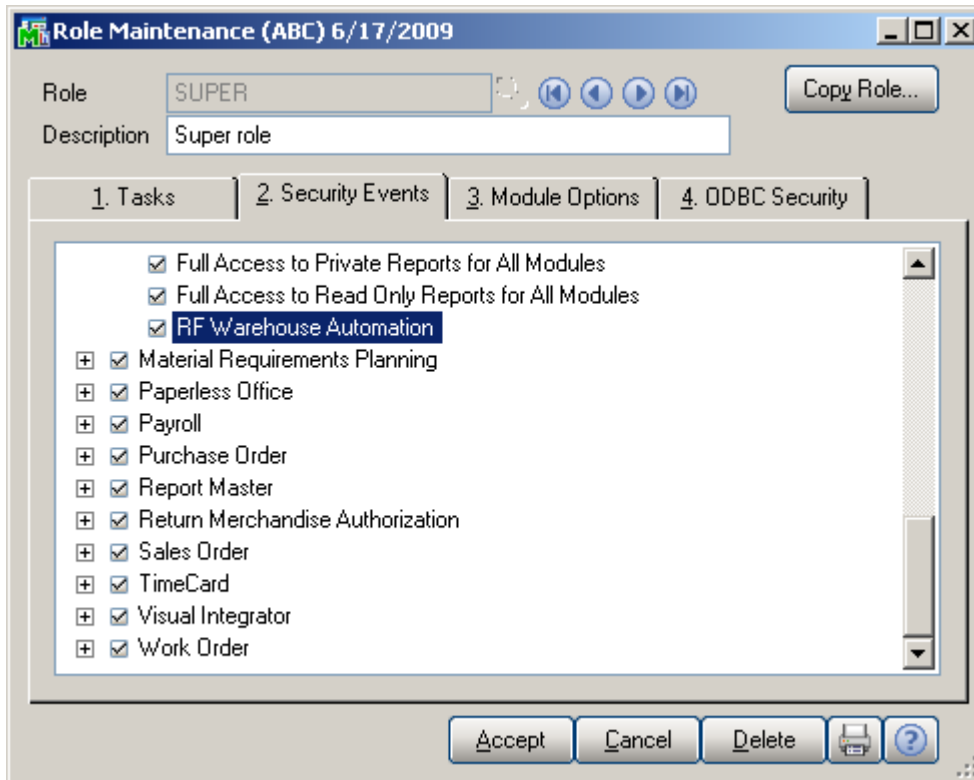

Enter **Serial Number** and **Unlocking Key** provided by IIG, and click **OK**.

If multiple IIG Enhancements are installed, Serial Numbers and Unlocking Keys should be entered for each enhancement.

IIG Registration Form can be printed by using the **Print Registration Form** button.

MAS 90 for Windows CE Launcher

*Note: The **RF Warehouse Automation** security event must be enabled in the Role Maintenance for the role assigned to the user in order to allow running MAS 90 for Windows CE.*

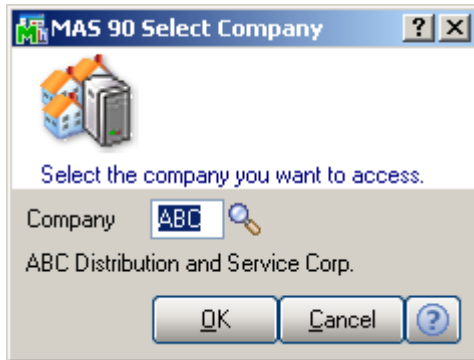

When running MAS 90 for Windows CE, the first screen you see is the **User Logon** screen:

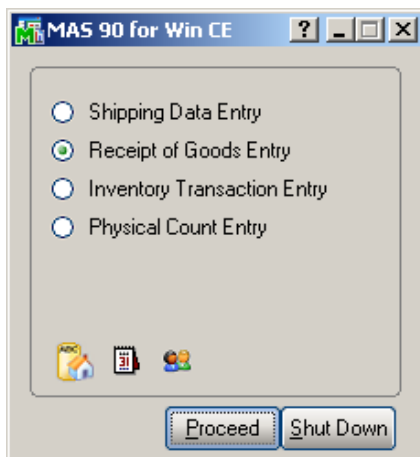

Enter your user logon and password.

Then select the Company:

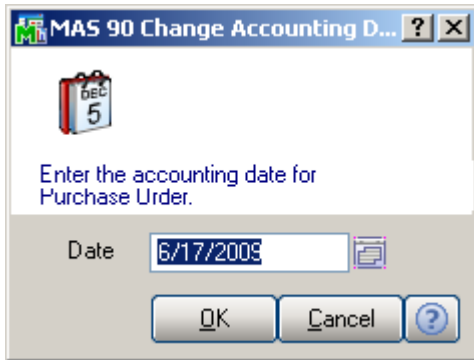

The launcher is opened:

The **MAS 90 for Win CE** launcher enables you to work with **Shipping Data, Receipts of Goods, Inventory Transaction (Transfer and Adjustment) and Physical Count**.

To launch any of these options, select it and click the **Proceed** button, or simply double-click the option you want.

You can also change the active **Company, Date, and User** clicking the icons below.

The **Shut Down** button closes MAS 90 for Windows CE.

Shipping Data Entry

If **Batch Entry** is allowed in the **Sales Order Options**, the **S/O Shipping Batch** screen is displayed before opening the **Shipping Data Entry** screen.

The screenshot shows a dialog box titled "S/O S/O Shipping Entry...". It contains the following fields and controls:

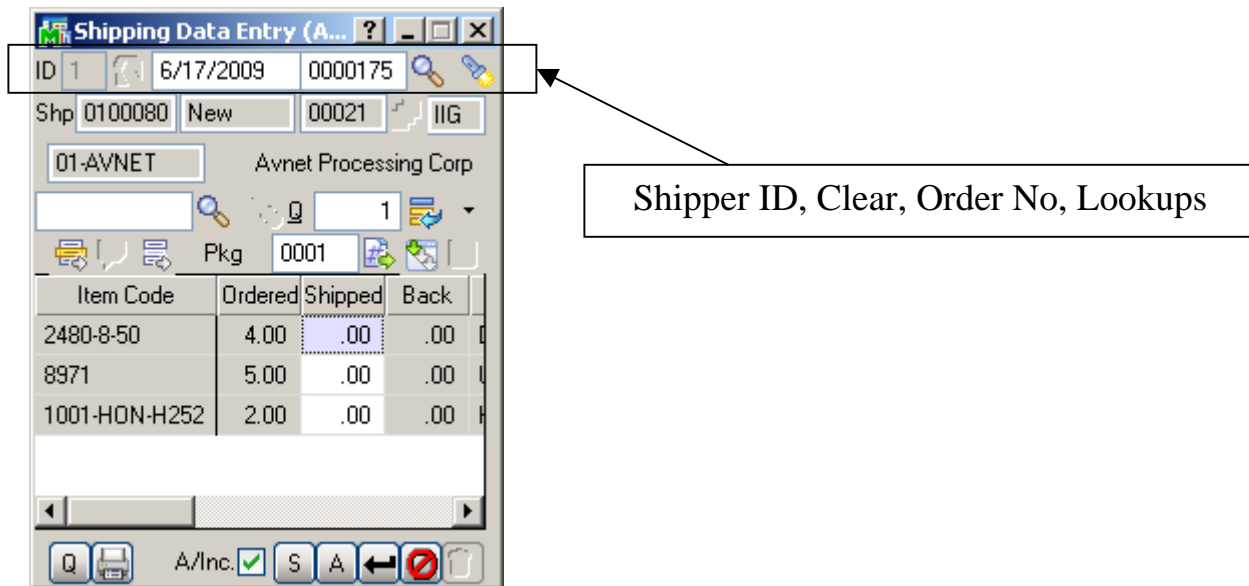

- Batch No:** A text field containing "00021". To its right are four navigation buttons: a square, a left arrow, a right arrow, and a square.
- Comment:** An empty text field.
- Private Batch:** A checkbox that is currently unchecked.
- Action Buttons:** Four buttons labeled "Modify", "Verify", "Renumber", and "Merge".
- Status:** A dropdown menu showing "Available".
- C. By:** Two empty text fields.
- Entries:** A text field containing "0".
- M. By:** Two empty text fields.
- Footer Buttons:** Three buttons labeled "Accept", "Cancel", and "Delete".

Click the **Next Batch Number** button to start a new batch, or enter an existing batch number.

In this case, the batch number is displayed on the **Shipping Data Entry**, and can be changed using the **Batch Number** button.

The **Shipping Data Entry** screen enables you to enter shipping data.

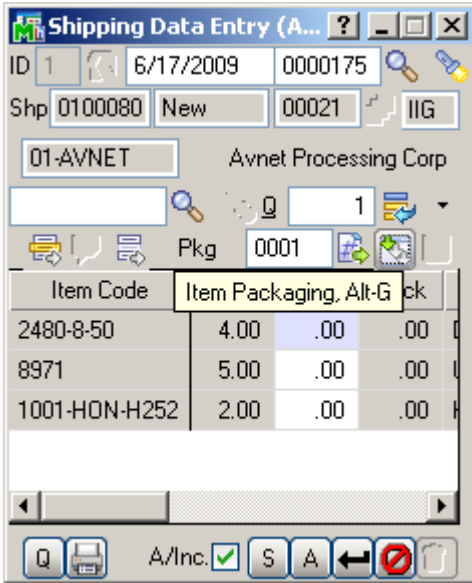

S/ID is Shipper ID.

 is Clear. Next to it is the Order No.

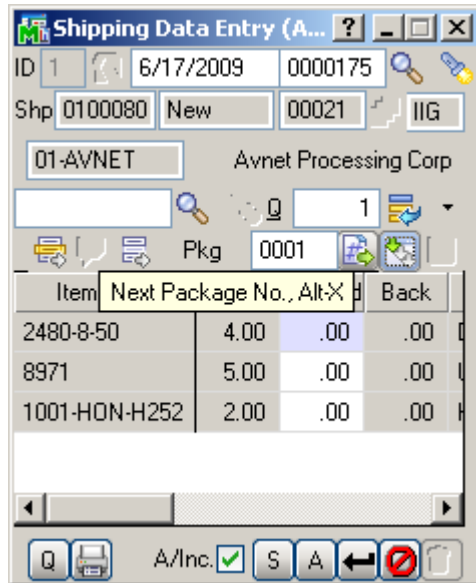

First **Lookup** displays the Sales Order List, to ship the selected Order. Second lists already entered Shipments.

Shp. is the Shipping Number and Status.

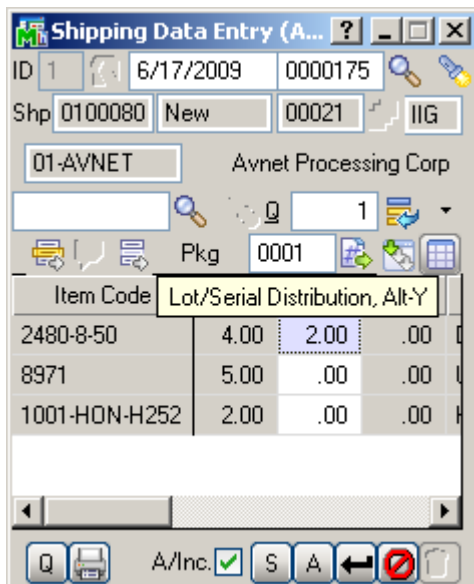

Click the **Item Packaging (Alt-G)** button to open the Item Packaging Maintenance.

You can create the Next Package by the help of Next Package No. button.

The **Lot/Serial Distribution** button is enabled for Lot/Serial lines.

The **Lot/Serial Distribution** screen is opened automatically upon entering the Shipped Qty.

Item: 2480-8-50 DESK FILE 8" CAP 50

Tracking

The **Tracking...** button opens the **Summary Package Tracking Maintenance** screen.

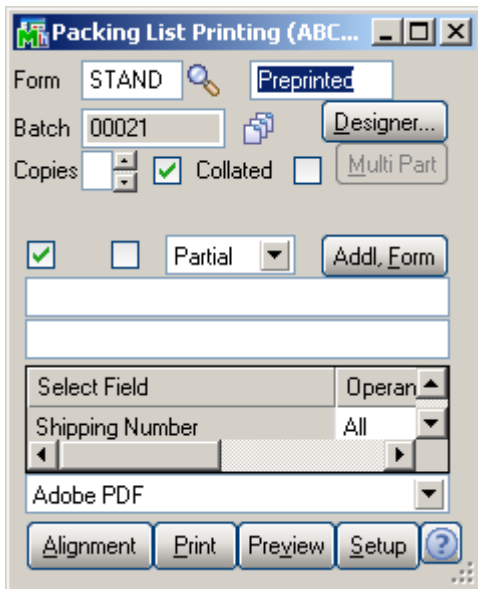

The **A** button on the Shipping Data Entry screen opens the **Ship To Address** screen.

The screenshot shows a window titled "Ship to Address". It contains several input fields and a checkbox:

- Ship To: Residential Add.
- Name:
- Address:
- ZIP Code: State:
- City:
- Country:

Packing List Printing

If the **Automatically Print Shipping Documents** box is checked on the **Main** tab of the **Shipping Setup Options** program under the **Sales Order Setup** menu, and the **Shipping Document to Print** is set to **Packing List** or **Both**, the **Packing List Printing** screen is opened when **Accepting Shipping Entry**.

Graphical Crystal printing is available.

If the **Addit. Packing Lists** box is checked; the **Additional Packing Lists** screen is displayed after printing (or previewing), allowing the user to print the additional lists.

++NEW++ and ++AUTO++

RFS Receipt of Goods works with bar code scanners.

If the **New** box is checked, the program will add items in new lines irrespective of their presence in the existing lines.

If the **Auto Increment** box is cleared, the program will find line with this item and select that line. You can increase the quantity in the line manually.

If the **Auto Increment** box is checked, the program will automatically increase the quantity of the item in the line where the received quantity does not exceed the ordered. A new line will be added only if there is no such line.

You can either check these boxes with the mouse or type in ++NEW++ or ++AUTO++ respectively in the Item Number field.

Inventory Transaction Entry

The **Inventory Transaction Entry** screen allows entering Transactions of the **Transfer** and **Adjustment** types.

The screenshot shows the 'Transaction Entry' window. The 'Transaction Type' is set to 'Transfers'. The 'Entry No' field is empty. The 'Transaction Date' is '02/25/2008'. The 'Transfer From Whse' is '000', with 'CENTRAL WAREHOUSE' displayed below it. The 'Transfer To Whse' field is empty. There is a 'Comment' text area below. At the bottom, there are navigation buttons (Previous, Next, etc.), 'Accept', 'Cancel', and 'Delete' buttons. A status bar at the very bottom shows 'IIG ABC 2/25/2008'.

Select **Transfers** in the **Transaction Type** drop-down list and click the **Next Entry Number** button. Enter the **Transfer Date**, **Transfer From** and **To Warehouses**, and **Comment**.

The screenshot shows the 'Transaction Entry' window after several changes. The 'Transaction Type' remains 'Transfers'. The 'Entry No' is now '00000002'. The 'Transaction Date' is '02/25/2008'. The 'Transfer From Whse' is '000', with 'CENTRAL WAREHOUSE' displayed below it. The 'Transfer To Whse' is '002', with 'WEST WAREHOUSE' displayed below it. The 'Comment' text area is still empty. The navigation and action buttons are the same as in the previous screenshot. The status bar at the bottom shows 'IIG ABC 2/25/2008'.

You can navigate through the Transactions using standard navigation arrow buttons at the bottom of the screen. Click the **Lines** button to open the **Transaction Lines** screen.

Bin Location

Item Number

Product Line

All Product Lines

Navigation arrows: Left, Right, Home, End

Buttons: Lines, Accept

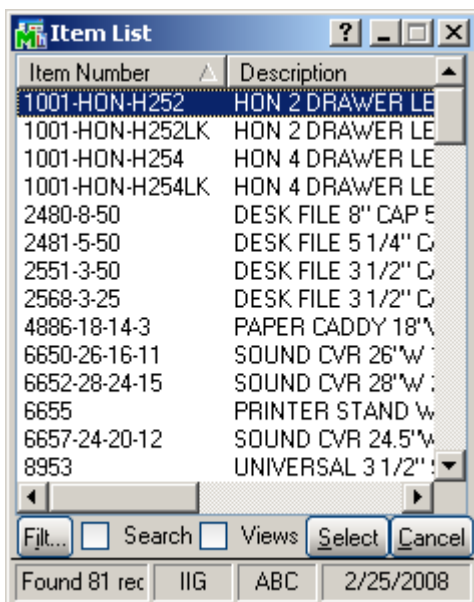

Enter Wareh IIG ABC 2/25/2008

You can navigate through the Warehouses using standard navigation arrow buttons at the bottom of the screen.

Click the **Lines** button to open the **Physical Count Lines** screen.

The **Lookup** button opens the **Item List** screen.

Item Bin Location will be displayed for the selected item.

Bin Location	Item Number	U/M
E-300-10	1001-HON-H252	EACH

HON 2 DRAWER LETTER FILE W/O L

Count: 0.00

Bin Location	Item Number	U/M	Count
E-300-10	1001-HON-H252	EACH	0.00

Auto Incr. OK

If the **Auto Incr.** box is cleared, the program will find the item and select that line. You can increase the count manually.

If the **Auto Increment** box is checked, the program will automatically count up the item just after entering/scanning the Item Number.

You can enter/select the Item number or its General Alias. If the selected Item is Lot/Serial, all the Lots (Serials) of the item are listed.

Select a lot item from the Item List.

Bin Location	Item Number	U/M
C-100-10	2480-8-50	EACH

DESK FILE 8" CAP 50

Lot Number: JAN10 Count: 2.00

Bin Location	Item Number	U/M	Count
C-100-10	2480-8-50	EACH	2.00
E-300-10	1001-HON-H252	EACH	0.00

Auto Incr. OK

Enter lot number in the **Lot Number** field and click **Enter**.
If the entered Lot Number exists in the list it will be selected, otherwise new Lot Number will be added in the list.

The screenshot shows the 'Physical Count Lines' dialog box. The 'Bin Location' is 'C-100-10' and the 'Item Number' is '2480-8-50'. The unit of measure is 'EACH'. The description is 'DESK FILE 8" CAP 50'. The 'Lot Number' field contains 'FEB10' and the 'Count' is '1.00'. The list below shows the following items:

Bin Location	Item Number	U/M	Count
C-100-10	2480-8-50	EACH	1.00
JAN10		EACH	2.00
E-300-10	1001-HON-H252	EACH	0.00

The 'Auto Incr.' checkbox is checked. The 'OK' button is visible at the bottom right.

If the **Auto Incr.** box is cleared, the Lot number with 0 count will be added. You can increase the count manually. If the **Auto Increment** box is checked, the program will automatically increase the count of the lot.

Enter ++**Auto**++ in the **Item Number** or **Lot Number** fields and Enter to check/uncheck the Auto Incr. box automatically.

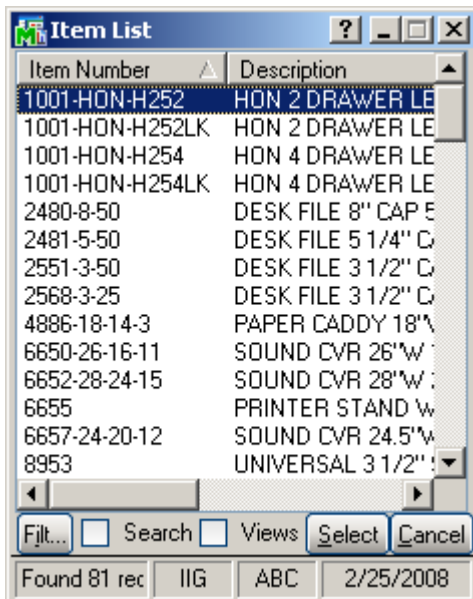

The screenshot shows the 'Physical Count Lines' dialog box. The 'Bin Location' is 'C-100-10' and the 'Item Number' is '2480-8-50'. The unit of measure is 'EACH'. The description is 'DESK FILE 8" CAP 50'. The 'Lot Number' field contains '++AUTO++' and the 'Count' is '0.00'. The list below shows the following items:

Bin Location	Item Number	U/M	Count
C-100-10	2480-8-50	EACH	0.00
FEB10		EACH	1.00
JAN10		EACH	2.00
E-300-10	1001-HON-H252	EACH	0.00

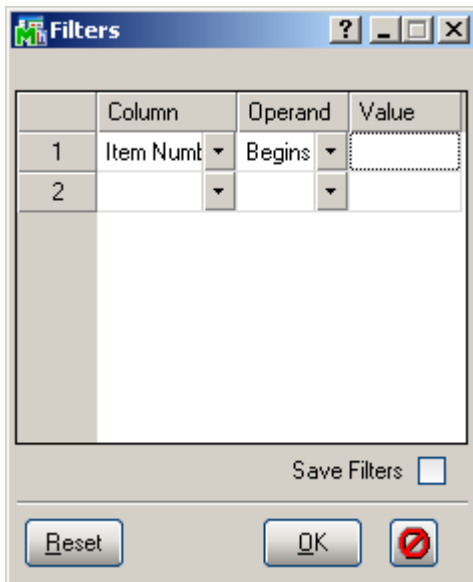

The 'Auto Incr.' checkbox is unchecked. The 'OK' button is visible at the bottom right.

Lookups in RFS

Lookups in the RFS enhancement enable all the functionality the standard MAS 90 lookups have (except for the Zoom button). The starting symbols can be entered before clicking the Lookup button to narrow the displayed items list.

The **Filt...** button enables setting **Filters**.

After applying the filters, the **Filt...** button appears red.

Check the **Search** box to specify search criteria in the displayed fields. Click **Find** to search with the entered criteria.

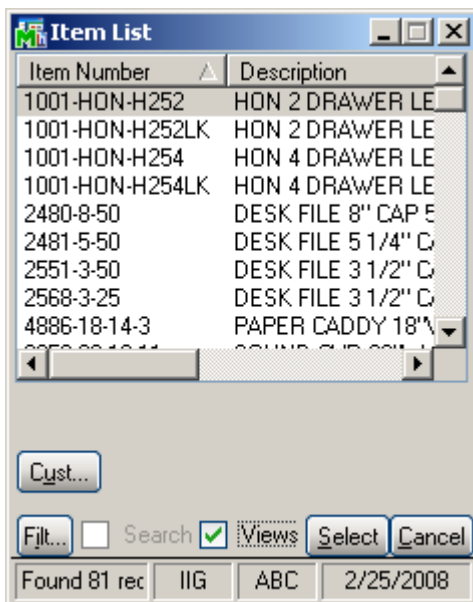

Check the **Views** box to work with lookup views.

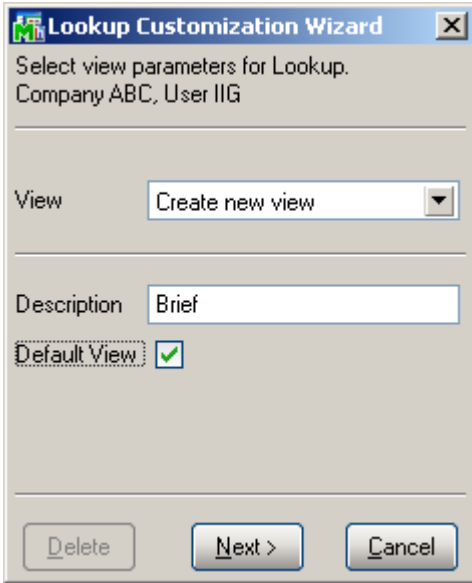

Select a view from the **View** drop-down box to switch to that view.

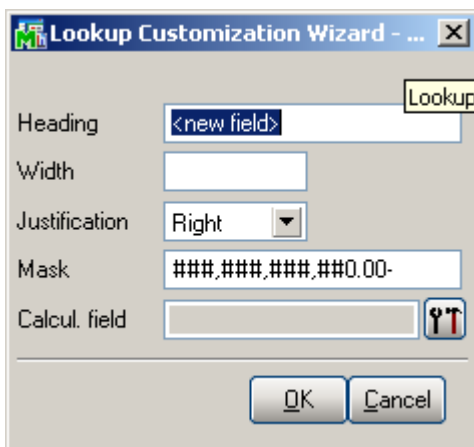

If there is no custom view, the **View** drop-down box is not visible.

Click **Cust...** button to create new or change an existing view.

UPC Processing in RF Warehouse Automation

Note: You must install the UPC enhancement after installing RFS on your system. Don't forget to run the SWTEMP program after UPC installation.

If you have IIG's UPC (Universal Product Codes Processing) enhancement installed and the UPC options setup in your system then you can use the UPC codes instead of Item Numbers in all entries where Item number is used.

Here is an example of Receipt of Goods. Scan the UPC code and click Ok.

Whse	Ordered	Back Ordered
	0.00	0.00

Cst	Ex.
.000	.00

Req.	U/M

G/L	Rcvd
	0.00

1	/C01 PLEASE SEND TO THE ATT
2	6655 .00
	000 0.00 81.250

The Item Number corresponding to the scanned UPC code is added to the lines.

Line	Whse	Ordered	Back Ordered	Cst	Ex	Req	U/M	CASE	Rcvd
1									
2	000	3.00		81.250					
3	000	5.00		78.300					
Total: 635.25									

RF Warehouse Automation for Multi-Bin Processing

The **RF Warehouse Automation** enhancement works with the IIG Multi-Bin Processing enhancement, and can be installed over the previously installed Multi-Bin Processing enhancement. For details on installing Multi-Bin Processing, see the Multi-Bin Processing manual.

The **Multibin Physical Count Entry** and **Bin Transfer** menus become enabled for the MBN system.

Appendix

An example of RFS 4.20 Installation on handheld devices

1-Microsoft Active Sync should be installed on the computer:

1-Download:

<http://www.microsoft.com/downloads/details.aspx?FamilyID=7269173A-28BF-4CAC-A682-58D3233EFB4C&displaylang=en>

(If this link didn't work easily open www.google.com and search for "Download Microsoft Active Sync")

2-Click on Run

3-On Welcome Page Click Next

4-Accept License Agreement and click next

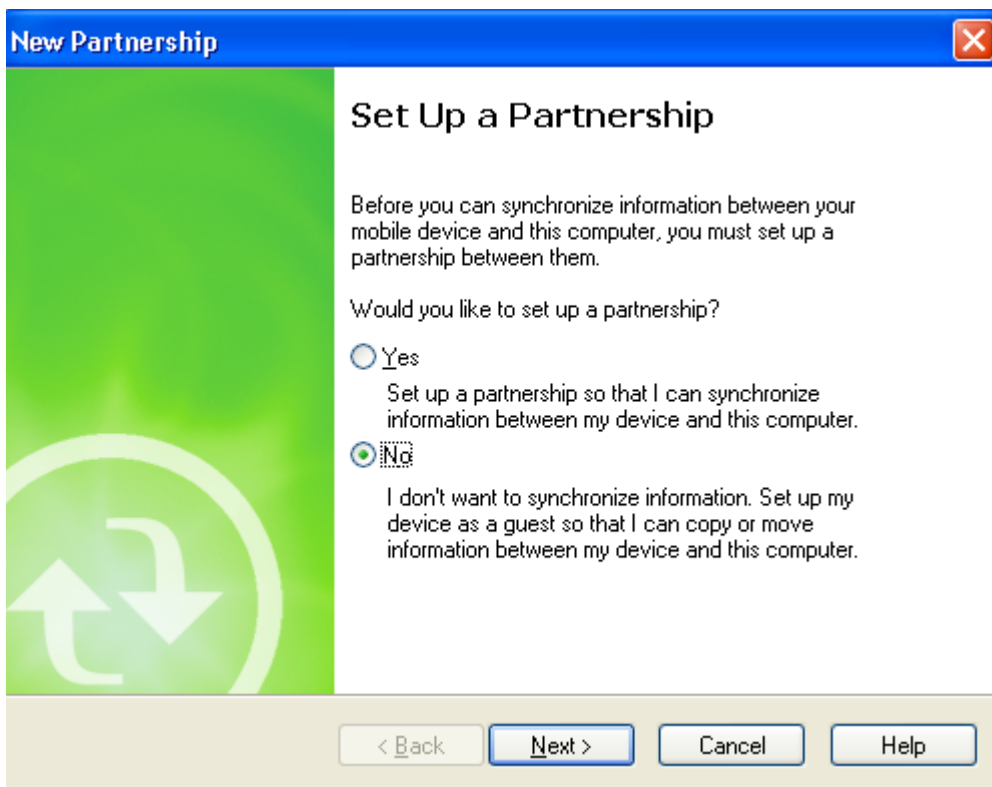

5-Enter Customer Information and click next

6-Choose Destination folder and click next

7-Install...

8-Finish

2-After Installation of Microsoft Active Sync connect your PDA to the computer using USB Cable and select Guest Partnership (No) and click next.

3- In order to make connection between handheld device and Citrix server, Citrix ICA client for windows CE has to be installed on PDA:

1-Download Citrix ICA client for Windows CE on your computer:

<http://www.citrix.com/site/SS/downloads/details.asp?dID=2755&downloadID=3602>
(If this link didn't work easily open www.google.com and search for "Citrix ICA client for windows CE")

2-Installation:

1-Run cesetup.exe

2-It will ask for installation path:

3-Click on "No" button

4-following screen will pop up:

Choose “Application” option from drop down list and click “OK” and follow the installation on PDA screen to complete the installation. It will add two icons on PDA’s Programs screen:

5-finish

4- Configuration of RFS on Handheld Device:

1-On handheld Device Click on Start then Programs

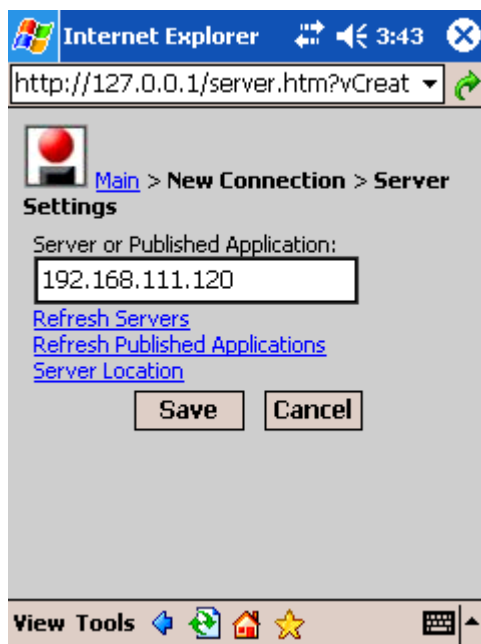

2-Choose ICA Client

3-Create New Connection

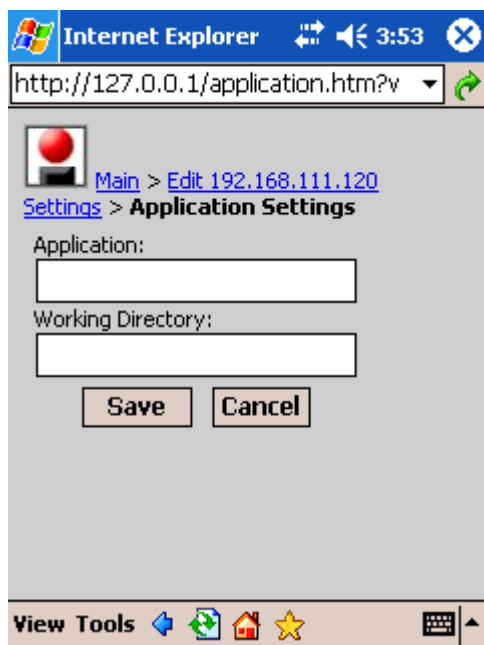

4-Enter the Citrix Server IP address

5-Save

6-Edit

7-Edit Application Settings

8-In this step you need to know the MAS 90/200 running address on Citrix Server. So, Login to the CITRIX Server and Right-click on the MAS 90/200 program Shortcut and select properties then write down the Address in Start-in path.

According to Shortcut address on Citrix Server fill the Application and working Directory fields:

Application: your path\MAS90\Home\pvxwin32.exe -hd ..\launcher\sota.ini
..\soa\RFS_Startup.m4p

Working Directory: your path\MAS90\Home

(Where *your path* stays for the path to your MAS 90/200 Start-in path, e.g. D:\MAS\Mas410\Rfs).

10-Save

11-Click on Edit link and click on Edit Logon Information.

- 12-Enter your Citrix server logon Username, Password and Domain and save it.
- 13-Click on “Edit <citrix server IP address> Settings” link and click on “Edit Windows Settings”

- 14- Click on “Change to Fit to Screen” link and save it.
- 15- Finish

Sample

For the setup of Symbol MC9090 handhelds

AD Prep and Documentation

Allocate the handheld's IP address, HH username, and hostname. Place adhesive labels on the handheld using the format "HH<##>

<hostname> <IP address>".

Update info on the Handheld IP's Excel Spreadsheet.

Initial Handheld Setup

1. Immediately place the unit in the charger to ensure the backup battery becomes fully charged. Once the handheld is charged, proceed to the next step, removing the handheld from the charging unit. (Charging will be more rapid if the handheld unit remains powered off.)
2. Click on the Start button and set the system time.
3. Enter the hostname of the handheld and its description.
 - Go to Start > Settings > System tab > About > Device ID tab > Device name:
 - (In the Description field, input the HH user who will be using the handheld.)
 - Click OK to exit.
4. From the main screen, disable 802.11d wireless access by using the Wireless Options tool.
 - Select the wireless icon on the lower right of the screen, and then select Options from the pop-up menu.
 - From the drop-down menu, select "Regulatory", then clear the "Enable 802.11d" checkbox.
 - Click Save to save changes, then Exit.
5. **For P3 handhelds only** – Enable both 2.4 GHz and 5.0 GHz bands for wireless connectivity.
 - Select the wireless icon on the lower right of the screen, and then select Options from the pop-up menu.
 - From the drop-down menu, select "Band Selection" and ensure that both "2.4 GHZ Band" and "5 GHz Band" are selected.
 - Click Save to save changes, then Exit.
6. Connect the handheld to your company wireless network
 - Select the wireless icon on the lower right of the screen, and then select "Find WLANs" from the pop-up menu.
 - Once the scan for WLANs has finished, select and hold your stylus over the "yournetworkname" WLAN, then select Connect to initiate the connection wizard. Enter the following settings:
 - Profile ID – accept both defaults, which should be "yournetworkname". Click Next to continue.

- o Operating Mode – accept both defaults, which should be “Infrastructure” and “Allow Any Country”. Click Next.
 - o Authentication – accept default “none”. Click Next.
 - o Encryption – use the drop-down menu to select “40-Bit WEP”. Accept the default Key Index of 1 and leave the “Use Passkey” checkbox unchecked. Click Next.
 - o 40-Bit WEP – replace the password fields with 10 lowercase a’s: aaaaa aaaaa. Click Next.
 - o IP Address Entry – Use the drop-down menu to change the option to “Static”. Click Next. Enter the IP Address and Subnet Mask, then check the Advanced check box. Click Next. Leave the G/W field blank, enter DNS server info, and leave the WINS field blank. Click Next.
 - o On all remaining screens, accept all defaults. You will then be back at the Manage Profiles screen. Click OK to exit.
 - o If you are prompted with a pop up box that says “Establishing Connection”, choose the “Work” connection.
 - o On the lower right corner of your screen, you should see your wireless status indicator either in red, yellow, or green, indicating the strength of your wireless signal.
7. Test connectivity to your LAN.
- Click on the wireless status icon in the lower right corner of your screen and select “Wireless Diagnostics” from the popup menu.
 - Select ICMP Ping.
 - In the IP field, enter 172.16.1.1, and click on Start Test.
 - Monitor the Total Tx and Total Rx indicators to ensure you are able to ping the company gateway.

Installing The Datawedge Application

1. Place the handheld in a charger and connect the charger via a USB cable to a computer that has Microsoft ActiveSync installed.
2. Upon your computer’s registering the connected mobile device, navigate through the Active Sync wizard, indicating that there is nothing you want to synchronize. If your system does not connect to the handheld, try adjust the “USB to PC” setting on the handheld. By default the “Enable advanced network functionality” checkbox is checked. You should uncheck it if you experience any connectivity issues.
 - Go to Start > Settings > Connections tab > USB to PC
3. Go to your computer, and select the “Explore PocketPC” option from the Tools menu of Active Sync. This will open an Explorer window into your handheld.
4. Copy the appropriate Datawedge components, as excerpted below from Symbol’s documentation:
 - Unzip the DataWedge download package (if necessary) into a temporary folder on the PC.

- Copy "*\Bin\PPC\DataWedge.exe*" from the PC to the *\Application* folder on the device.
 - Copy "*\Application\DataWedge.cpy*" from your PC to the *\Application* folder on the device.
5. Browse to the *\Application\Bin\PPC\DataWedge.exe* file, hold the stylus on the file until the popup menu appears, and select Copy.
 6. Paste the shortcut into the *Windows\Startup* folder on the handheld. (If you cannot see the *Windows* folder, you may need to enable the option to unhide hidden and system files on your computer.) Then manually launch *Datawedge* by selecting it while you are still in the *\Windows\Startup* folder.
 7. Click on the *DataWedge* icon in the lower right corner of your screen, and from the popup menus, go to *Barcode > Prefix/Suffix*.
 8. Check the checkbox that says "Send ENTER key after suffix"
 9. Click OK to exit.
 10. Test the scanner by opening *Word Mobile* and performing a test scan.
 - Go to *Start > Programs > Word Mobile*
 - Click on *New* to create a new document if no other test document is available.
 - Scan a barcode and observe the data in *Word Mobile*. Each successive scan should be on its own line.
 - Exit until you get the handheld's main screen.

Installing the Citrix ICA Client

1. From your computer make sure that the handheld has been able to reconnect to your computer, and run the Citrix CE client program, *cesetup.exe*. Click OK when prompted.
2. Your computer will now display a message stating that you should check the handheld for any further messages to finish this installation. Click OK and proceed to your handheld...
3. Your handheld should now be asking you a location to which you want to install the Citrix client. Accept the default, which should be "Device", then click "Install" on the lower left corner of your screen.
4. Click on "I Accept" to accept the license agreement.
5. After the program installs, you will receive a confirmation message that installation was successful. Click OK to exit.
6. Warm boot the handheld to verify that *DataWedge* loads on startup.
7. Disconnect the handheld from the cradle and terminate your *Active Sync* session, as wireless access may be disabled while connected to *Active Sync*.

Connection Settings For Wireless Citrix Environment

1. Open the Citrix ICA client configuration utility.
 - Go to *Start > Programs > ICA Client*
2. From the main menu, select *PN Agent Properties*.

3. Select "Enable PN Agent".
4. In the Server URL field, enter the IP address 172.16.1.195, then click on the Save button.
5. If the connection is made, you will be presented with a Login Details screen. Enter the below details:
 - Username: the HH<##> ID of the handheld.
 - Password: the default password.
 - Domain: "your domain name"
6. Check the "Save Password" checkbox, and then click OK.
7. When the screen refreshes, scroll down and click on the Save button one more time.
8. At the top of that screen, click on the "Main" hyperlink.
9. Click on Edit Global Settings.
10. Click on Edit Preferences.
11. Scroll down to the "Enable Full Screen (No Local Taskbar)" checkbox, and check it.
12. Scroll to the bottom of the screen, and click Save.
13. Click the X to exit.
14. You should now be at the Programs Screen. Click the X to exit to the Main screen of the handheld.

Setting up a Connection to MAS

1. Configure the appropriate menu settings.
 - Go to Start > Settings > Personal tab > Menus
2. Scroll down the Menus page until you see the "T200" icon, and select it. Click OK to exit.
3. The T200 icon should now appear on the Start Menu.
4. Click on the T200 icon to initiate a connection to MAS.
5. Enter the appropriate User ID and corresponding password.
6. If this is the first time you have connected to MAS using this handheld, MAS will prompt you for the company code you wish to access. Enter TGL and select OK.
7. You should now be at the MAS 90 for Win CE main menu. Select Shut Down to exit MAS. You will be returned to the handheld's main screen.

Notes

1. In the event that the handheld is cold booted, most (if not all) of the setup steps will need to be repeated. A warm boot will cause no loss of settings.

When resetting after a cold boot, make sure to rename the handheld to the appropriate hostname BEFORE configuring the Citrix environment. This will aid in not causing duplicate terminal server licenses from being issues to the same handheld. Also make sure the handheld is not connected to Active Sync.
