

CONSTRUCTION EQUIPMENT MANAGEMENT

AcuConstEquipMgmt involves many aspects of managing fleet of heavy equipment from setup, location tracking (telematics / RFID), time based availability tracking (reservations), equipment P&L (ROI) tracking cost (labor & material for shop or field repair by own or outside mechanics for both scheduled services & repair), rental revenue (intercompany, customer billing or project costing), moves (between warehouses and job sites) to recurring fueling. Assign equipment to projects easily by viewing time-based availability, set and manage scheduled services & check-ins and check-outs for each equipment. Generate move tickets by scanning equipment in the yard or at the job site.

COMPLETE EQUIPMENT MANAGEMENT

- **Equipment Location Tracking.** Use telematics or RFID to track the location of each equipment. Receive alerts for trouble and schedule services.
- **Flexible Revenue Tracking.** Post revenue to equipment ROI and post revenue to project or create inter-company or customer invoices for rentals.
- **Field Data Capture.** Track employee time for repair and scheduled services both in house and field work.
- **Time Based Availability.** View equipment availability, make reservations and create orders to move projects to job sites.
- **Inspections and Scheduled Services.** Ability to define scheduled services (both based on days or usage) and required inspections (checklist) by equipment.
- **Scan Shipments and Returns (Bar Code /RFID).** Track products staged to be delivered and manage routes and deliveries on a drag and drop scheduling board on hourly or daily board. Track setup, tear down, drive back, check-in and check-out time for each job.

KEY BENEFITS

MORE OPPORTUNITIES

- Offers a complete solution using Projects, Rentals, Equipment ROI, Work Tickets for Repair and Scheduled Services, Fixed Asset, Payroll and Financials in a cloud based multi-company platform
- View real-time location and reported alerts for each equipment
- Ensure proper care of each equipment using scheduled services setup for each equipment
- Track status of each equipment, track check-in and check-out inspection results and repair expenses for each equipment

PREPARE FOR THE DAY

- Use dashboard to view / drill down to orders to ship or to be returned for the entered date range.
- Support crew clock in/out and crew manager approval of timecards for field service orders, staging of jobs, and production work orders. Load data captured into Payroll.

CONSTRUCTION EQUIPMENT MANAGEMENT FEATURES AND CAPABILITIES

Track Meter Reading for each Equipment	Enter starting and ending meter reading for each equipment. Ability to force entry of meter reading during rental shipment and return entries.
Equipment ROI	Track purchase cost, expenses from AP and Service Orders and Revenue generated for each equipment.
Cost Posting to GL & Project Accounting	Ability to post cost for rentals to GL and Project Accounting. Ability to generate invoices based on cost plus markup using project accounting.
Manage Equipment Check in / out & Scheduled Services	Ability to define needed inspections for check in/out and scheduled services. Manage the inspection process and track the result of each inspection.
Crew Scheduling	Schedule crew for each rental order line based on crew availability, skill and license requirements when integrated with Field Service module.
View Order Activity and Swap Items, S/N and Billing Rates	View when each line is entered, shipped, invoiced and returned. Swap item or serial numbers on rental contracts and change rental rates on existing rentals (price increases).
Track Information by Equipment	Track return notes including pictures, days on job site, utilization, fixed asset depreciation and equipment IDs.
Create Projects and Production Work Orders	Create projects and production work orders from rental contract entry based on project templates, and defined production options and routing steps.
Invoice Missing and Damaged Items	Generate an invoice to bill for missing and damaged items. Provide a grace period before billing customers for missing and damaged
Equipment ROI Displays	View revenue and cost for any period range by equipment.

THE ACUMATICA ERP DIFFERENCE

Acumatica delivers a full suite of integrated business management applications unlike any other ERP solution today.

STREAMLINE OPERATIONS

Manage your business more efficiently:

- Automate processes
- Control workflows
- Access the system from anywhere on any device – including mobile
- Promote collaboration with all-inclusive user licensing

ADAPTABLE SOLUTION

Add and extend:

- Deploy in-house or in a private or public cloud
- Easily configure your solution to fit your needs
- Add capabilities such as CRM or data visualization at any time
- Extend to other solutions and applications beyond ERP

YOUR BUSINESS ACCELERATED

- Accelerate business performance and make smarter decisions with automated processes, real-time data collection, financial analyses, and forecasting
- No per user pricing – system scales as your business grows
